## EXECUTIVE SUMMARY

*This report covers data from January to March 2021, so court activity during this period has been severely affected by the COVID-19 pandemic. Figures published show that although courts continue to make more use of remote audio and video technology, the impact of COVID-19 is clear to see. It is expected that the limited operation of the family courts during the COVID-19 pandemic will continue to have an impact on many of the published figures in this and future releases.*

*Administrative case management reviews were introduced by the Lord Chief Justice as part of the coronavirus contingency arrangements. This has resulted in Judges investing significant time reviewing cases and making directions or orders administratively (where appropriate), and this has continued even as courts have resumed to support business recovery. This extra time is not recorded on the courts operating system (ICOS), and therefore is not reflected within the sittings times published within this report.*

- This bulletin provides information on throughput of Children Order business in Northern Ireland across the magistrates (Family Proceedings Courts), county (Family Care Centre) and High courts. This bulletin covers the period January to March 2021 and commentary on trends observed for this quarter in each year from 2012.
- There were 1,291 Children Order Applications received during January to March 2021. This was an 11% increase on the 1,167 applications received during January to March 2020. The number of applications disposed has increased by 31% from 868 during January to March 2020, to 1,134 for the same period in 2021.
- The most common reason for transfer is complexity at 66% (155 of 234 reasons).
- There were 350 own motion orders made in January to March 2021, and 8% (29) were in relation to Care Issues. This was a 79% increase on the same period last year when 196 own motion orders were made.
- There were 2,308 interim orders made between January to March 2021, this was a 9% increase on the same quarter last year when 2,123 interim orders were made. The majority were in relation to Care (1,348) and Contact (766) issues.
- There were 1,550 final orders made between January to March 2021, this was a 29% increase on the same quarter last year when 1,198 final orders were made. The majority of final orders made were in relation to Contact and Residence issues – 347 (22%) and 223 (14%) orders respectively.
- In January to March 2021, the average waiting time for applications disposed was 46.9 weeks for public law and 34.0 weeks for private law. The average waiting times have decreased by 5% for public law applications and increased by 10% for private law applications, compared to the same quarter last year (49.2 and 30.8 weeks).

- In the quarter January to March 2021 there were 1,638 children involved in the applications disposed. This was a 33% increase on the 1,228 disposed in the same quarter in 2020.
- In total there were 584 Children Order sittings for January to March 2021 compared with 498 for January to March 2020 an increase of 17% with a total time of 1,581 hours sat compared with 1,237 hours sat during the same period last year (an increase of 28%).

# 1 INTRODUCTION

The primary aim of the Children Order is to promote the welfare of children. The Order creates a clear, practical and consistent code of law governing the care, protection and upbringing of children and the provision of services to them and their families. It confers concurrent jurisdiction on all three tiers of the courts (High Court, county courts and magistrates' courts) so that subject to certain limited exceptions, any court can make any of the orders available under the Order. Under the Order the welfare of the child is the paramount consideration. When dealing with children, courts try to ensure that delay is avoided, and may only make an order if to do so is better than making no order at all.

All children order matters are dealt with at Family Proceedings Courts (which are part of the magistrates' courts), at Family Care Centres (which are part of the county courts) or in the Family Division (Office of Care & Protection) of the High Court. Where a Family Proceedings Court considers that the proceedings are exceptionally grave, important or complex, then the matter will be transferred to the Family Care Centre. Where the Family Care Centre believes that the case is suitable for hearing the High Court it may in turn transfer it to the High Court.

Matters affecting children are split into public and private law applications;

Public Law applications: are those brought by local authorities and include matters such as care, supervision and emergency protection orders.

Private Law applications: are those brought by private individuals, generally in connection with divorce or the parents' separation. Order types include parental responsibility, residence, financial provision and article 8 contact applications.

## **2 METHODOLOGY**

### **2.1 Data sources**

Data contained in the Tables are inputted onto the Integrated Court Operations System (ICOS). This system was implemented across the Northern Ireland Courts and Tribunals Service (NICTS) over a two year period from 2005 to 2007. While ICOS was introduced in the Children Order Proceedings during 2007, data derived from ICOS has been used as the source for official government statistics since April 2007, when the implementation of ICOS across all court tiers was completed. ICOS is a live operating system used in each court tier to process every part of court business, from receipt of payments through to the production of final orders made. The data are input into this system on a daily basis by court clerks, and this information is checked and confirmed by another member of staff to ensure the data entries are correct.

### **2.2 Methodology for generating data**

Statisticians based within the NICTS take a download of Children Order information from ICOS on a monthly basis. The information is downloaded using a package called Share Point which extracts all the relevant data from ICOS into text files which are refreshed with up to date information each weekend. The text files are downloaded onto a secure internal facility that only specified statistical personnel have access to. The data contained in the files are identified only by numbers and names and addresses are not held. These statistical files are not transmitted outside the NICTS statistical team. The statisticians based in the NICTS then import these data into the Statistics Package for Social Sciences (SPSS). SPSS is then used to perform extensive data validations to identify potential errors in the data and to ensure the data are reliable and robust.

### **2.3 Baseline and Time period**

Data contained within this bulletin relate to the time series 2012 to the current calendar year – 2021.

### **2.4 Data quality and validation**

Statisticians based in the NICTS have invested significant time and effort creating an extensive computer programme within SPSS to validate the information downloaded from ICOS. The programme includes over 100 checks against downloaded Children Order data to: (i) check consistency over time and between variables; (ii) reliability of data using logic checks; (iii) checking that variables fall within accepted ranges; and (iv) checking with the ICOS Support Team in the event of any major discrepancies that have occurred since the last download. The validation program produces user friendly tables highlighting the potential problems which are circulated to each county court venue as a validation report.

Each court division has a Case Progression Officer who is responsible for: monitoring accuracy levels on ICOS, by carrying out sample checks on data entry and court resulting; ensuring all validations on ICOS and manual statistics returns are completed in a timely manner; providing advice and identifying training needs; monitoring the confirmation of ICOS criminal court resulting, including the inputting of adjournment codes; and promoting

awareness of the impact error can have, its wide ranging consequences and the negative impact on the reliability of management information.

The Case Progression Officer is given a two week period from the date the validation report issues until all records are amended on ICOS. This ensures that the corrections are updated before the next download of files. After the files have been refreshed each weekend, all the data are then downloaded again, with the new download reflecting amendments made as a result of the validation reports. If any errors have not been corrected, they will continue to appear in the validation reports until the necessary amendments are made on ICOS.

The NICTS statistics team then ensure that all validations relating to the reporting period are amended prior to publication. Once these amendments have been checked, SPSS syntax programming is then used to generate the tables in the publication.

## **2.5 Frequency of Publication**

This bulletin is published on a quarterly basis. The next bulletin will cover the second quarter of 2021 and will be published on 20<sup>th</sup> August 2021.

## **2.6 Counting rules**

Receipts are counted from the date the case is entered onto ICOS. Disposals are counted from the result date that a final order was made against the case changing the case status to dealt with.

## **2.7 Changes in Methodology**

The recording of orders made within the Children Order courts have been reported at the participant level since 2007, and the introduction of ICOS. Children Order data in relation to orders made, is recorded on ICOS at the **application level**. The data is then extracted based on the **participants** selected on ICOS which indicate all relevant parties to whom the order applies.

Following an operational review of recording practices surrounding the selection of participants to whom orders apply in November 2013, a training program was implemented by operational colleagues. This training was delivered in early 2014 to ensure all relevant participants were being consistently applied on ICOS. This has had a knock-on effect on the numbers of own motion, interim and final orders being reported within the Children Order courts, with figures showing large increases since 2014.

Following a National Statistics consultation with users (for more information click on the following link:

[Northern Ireland Court Service Statistical Publications](#)

a change in the reporting of the orders being made within the Children Order courts from the participant level to the application level from 2016 onwards has been introduced, to overcome issues surrounding the inconsistent recording of participants to whom the orders apply and provide more user friendly data in terms of relating the orders made to the applications being received and disposed. Application level data counts distinct orders

made during the court process. This new methodology has been introduced to cover own motion, interim and final orders and will affect the numbers reported in tables 3, 4 and 5 in this publication.

The numbers of orders made will not be comparable with those published in Children Order Bulletins prior to 2016. To assist with comparisons over time, a back series of orders data from April 2007 to the end of 2015 are available on the Court and Tribunals website at the following link [Northern Ireland Court Service Statistical Publications](#)

## **2.8 Interpreting trends**

Care should be taken when comparing data trends before and after April 2007, when ICOS was introduced as the source for Children Order data. For further advice on differences in data between years, please contact the statistician responsible for this bulletin.

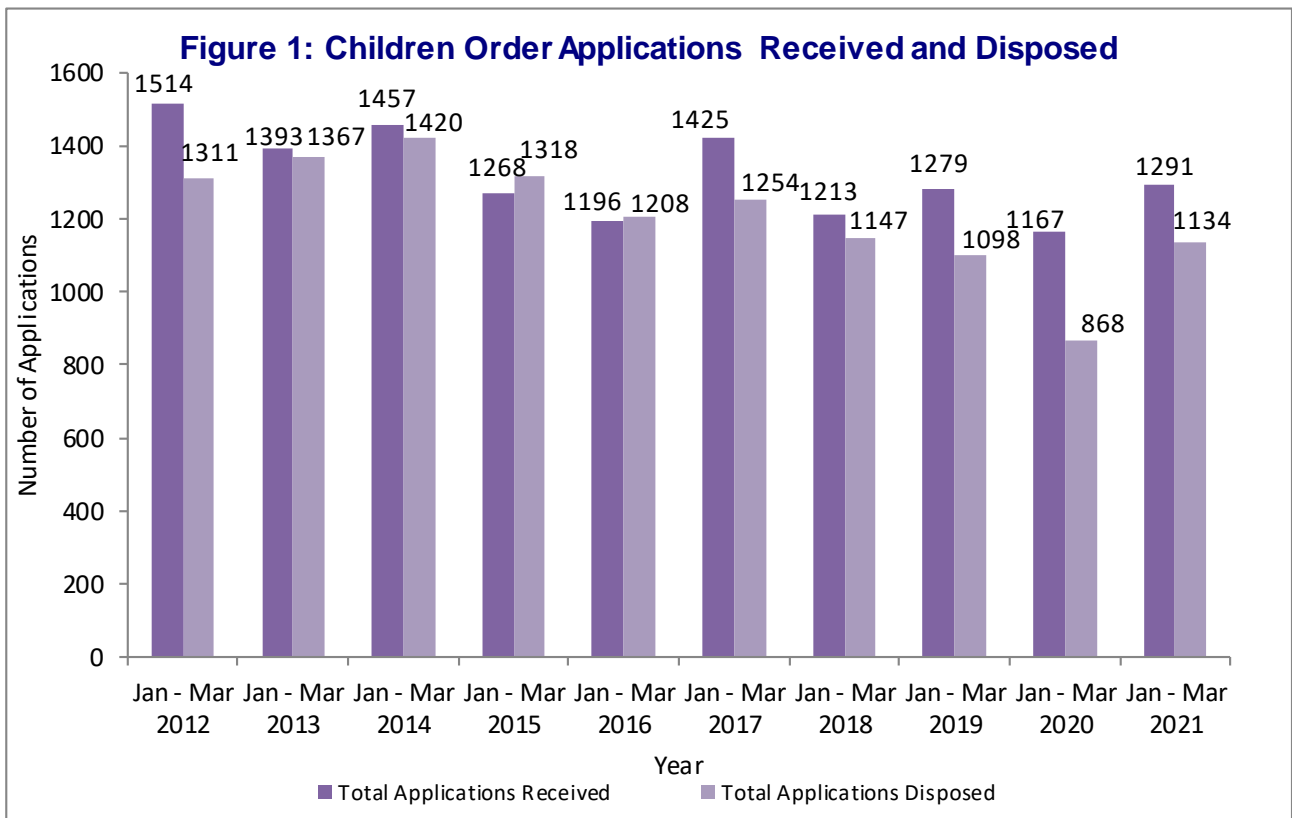

## **2.9 Revisions**

Any revision to data will be applied in light of the ASG (NICTS) Statistical Note 'Policy Statement on Revisions' which can be found on the Statistics and Research page of the Services section on the NICTS website [Northern Ireland Court Service Statistical Publications](#) Incorrect figures of changes to this publication will be published on the web in a formal Statistical Notice.

### 3. FINDINGS

#### 3.1 Receipts & Disposals

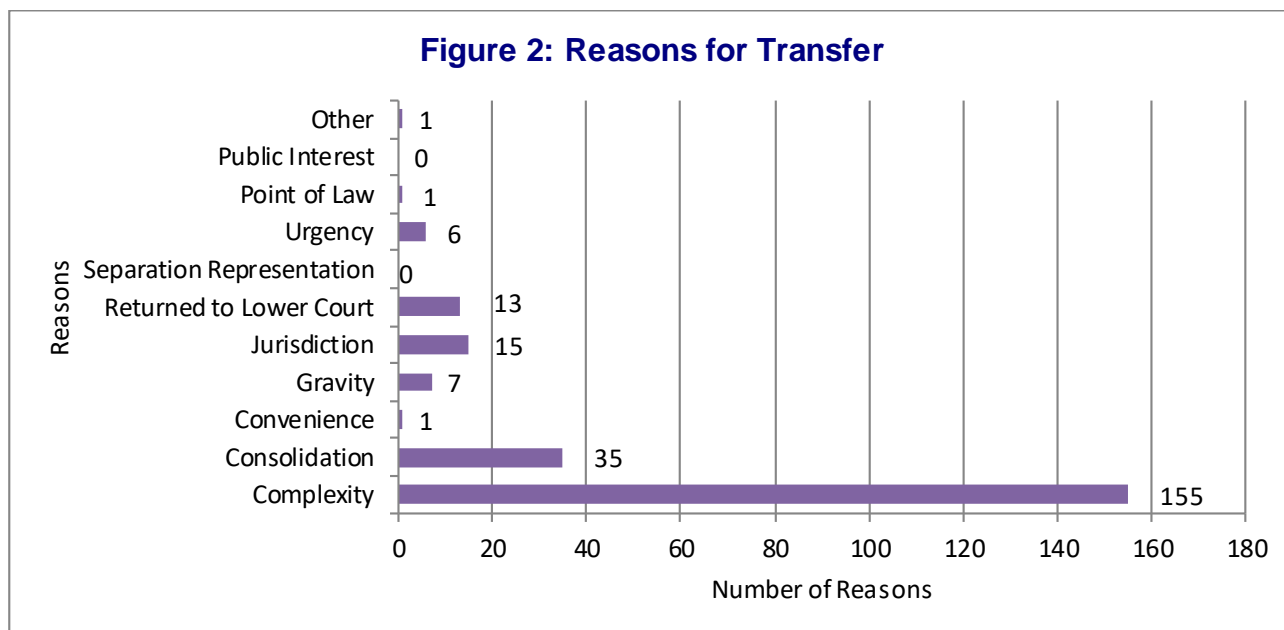

There were 1,291 Children Order Applications received during January to March 2021 (Table 1a). This was an 11% increase on the 1,167 applications received during January to March 2020. The number of applications disposed has increased by 31% from 868 during January to March 2020, to 1,134 for the same period in 2021 (Table 1a). The number of applications received and disposed for the January to March quarter over the last ten years is outlined in Figure 1.

The general trend in applications received in the January to March quarter fluctuated between 2012 and 2020, before increasing by 11% between 2020 and 2021. The trend in applications disposed fluctuated between 2012 and 2021, peaking at 1,420 in 2014, before decreasing by 20% between 2014 and 2021. The disposals were at their lowest level across the time series in 2020, however this is due to the COVID-19 pandemic, and therefore should be treated with caution. Disposals during this quarter have increased to similar levels as those seen in 2018, as the courts recovery process continues.

### 3.2 Transfers

The reasons for transferring children order applications are detailed in the graph below. The most common reason for transfer is complexity at 66% (Figure 2 – 155 out of 234 reasons). Across the 10 year time series, complexity has remained the most common reason, ranging between 56% and 77% of those applications being transferred.

### 3.3 Orders Made

**A change in the counting methodology for orders made was introduced in 2016, and therefore a comparison of figures in tables 3, 4 and 5 with Children Order bulletins prior to 2016 should not be made. A back series of data based on the new counting methodology is available via the following link:**

[Northern Ireland Court Service Statistical Publications](#)

**For more information please see details on page 3 or alternatively contact the statistician responsible for this publication.**

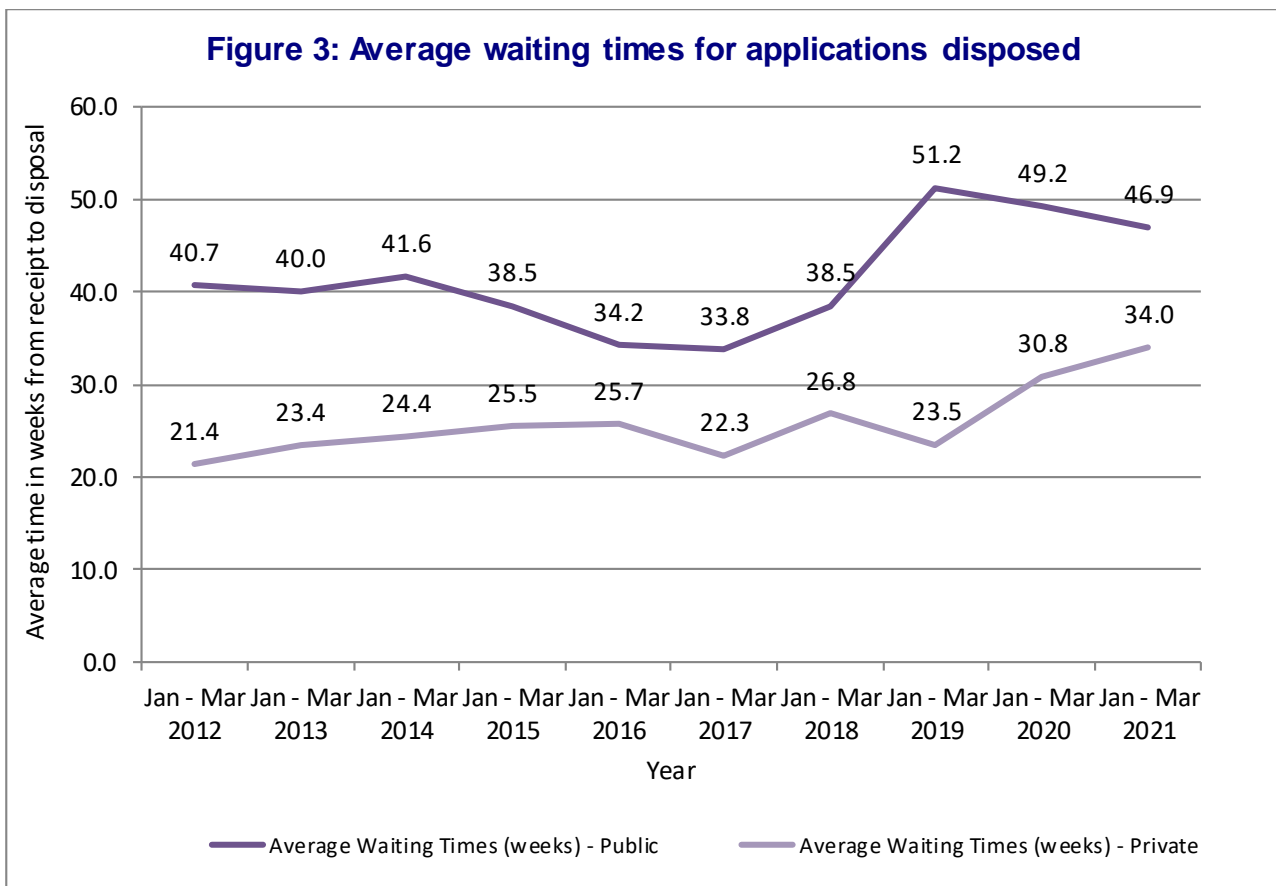

There were 350 own motion orders made in January to March 2021 compared to 196 in the same quarter last year, this is an increase of 79%. Of the own motion orders made 23% (80) were in relation to Contact and 8% (29) were in relation to Care.

There were 2,308 interim orders made, and the majority were in relation to Care (1,348) and Contact (766) issues. This was an increase of 9% overall compared to the same period last year, when there were 2,123 interim orders made.

There were 1,550 final orders made between January to March 2021. The majority of final orders made were in relation to Contact and Residence issues – 347 (22%) and 223 (14%) orders respectively. Compared to the same quarter last year, this is a 29% increase in the total number of final orders made (1,198).

## Waiting times

Between January and March 2021, the average waiting time for applications disposed was 46.9 weeks for public law and 34.0 weeks for private law. The average waiting times have decreased by 5% for public law applications and increased by 10% for private law applications in comparison to the same quarter last year (49.2 and 30.8 weeks respectively). Over the time series the trend for public law average waiting times has fluctuated, with an overall increase of 15% from 40.7 to 46.9 weeks, peaking at 51.2 weeks in 2019. Public law applications involve the local authorities and can often deal with complex and serious issues in relation to the welfare of a child, and this can affect waiting times. The trend in average waiting times for private law applications between 2011 and 2018 remained relatively stable, before increasing by 27% between 2018 and 2021. Caution should be taken when interpreting these waiting times, as the 2020 and 2021 data has been severely impacted by the COVID-19 pandemic.

### 3.4 Age and Gender of Children

In the quarter January to March 2021 there were 1,638 children involved in the applications disposed. This was a 33% increase on the 1,228 disposed in the same quarter in 2020. The trend in the numbers of children involved generally increased between 2012 and 2014 from 1,717 to 2,133 (24% increase), before decreasing by 23% between 2014 and 2021. Figure 4 below indicates the age categories of the children involved this quarter. The majority of children were between 5 and 8 years old (32%), the figure for the same quarter last year was 29%. The gender breakdown is shown in Table 7, with the split being 52:48 (male: female), the ratio for the same quarter last year was 49:51.

Due to rounding the percentages may not add up to 100%.

### 3.5 Sitings

In total there were 584 Children Order sittings for January to March 2021 compared with 498 for January to March 2020 (an increase of 17%), with a total time of 1,581 hours sat compared with 1,237 hours sat during the same period last year (an increase of 28%). Children Order sittings have fluctuated across the time series peaking at 584 in 2021.

<sup>8</sup> A court sitting is counted as any day where the judiciary sit in court. It does not include time in chambers or days where the judiciary are sitting in chambers.

<sup>9</sup> Children Order sittings refer to a sitting where any Children Order business is heard and the venue it was heard in.

<sup>10</sup> Administrative case management reviews were introduced by the Lord Chief Justice as part of the coronavirus contingency arrangements. This has resulted in Judges investing significant time reviewing cases and making directions or orders administratively (where appropriate), and this has continued even as courts have resumed to support business recovery. This extra time is not recorded on the courts operating system (ICOS), and therefore is not reflected within the sittings times published within this report.
