Northern Ireland Waiting Time Statistics: Cancer Waiting Times (July – September 2019)

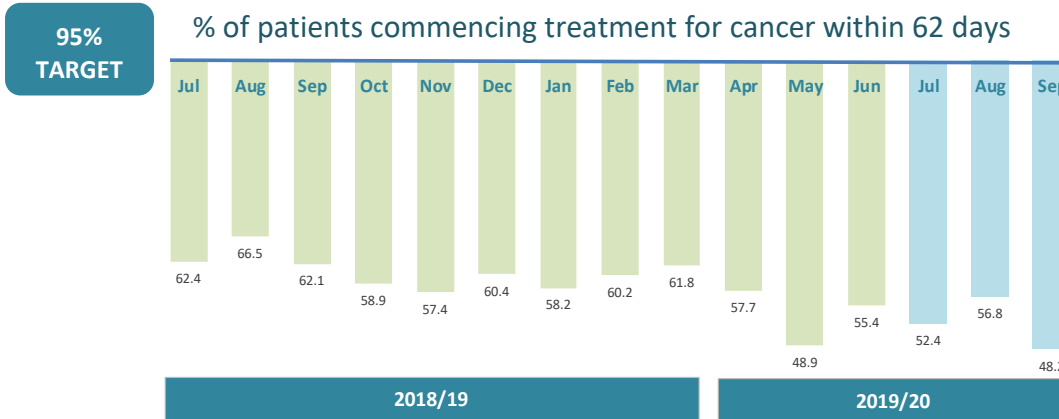

READER INFORMATION

Purpose:	<p>This publication presents information on waiting times for cancer services at hospitals in Northern Ireland during July, August and September 2019 and reports on the performance of Health and Social Care (HSC) Trusts in Northern Ireland, against the draft 2019/20 Ministerial Target for cancer care services, which states that:</p> <p><i>“During 2019/20, all urgent breast cancer referrals should be seen within 14 days; at least 98% of patients diagnosed with cancer should receive their first definitive treatment within 31 days of a decision to treat; and at least 95% of patients urgently referred with a suspected cancer should begin their first definitive treatment within 62 days.”</i></p> <p>All data are presented by Health and Social Care Trust and, where applicable, by tumour site. In order to preserve the privacy of individual patients, we do not report on individual counts below five. This does not affect the statistical inferences that can be drawn from the data.</p>
Statistical Quality	<p>The ‘Cancer Waiting Times Publication – Supporting Documentation’ booklet details the technical guidance, definitions, as well as notes on how to use the data contained within this statistical release. This booklet is available to view or download from the following link: https://www.health-ni.gov.uk/articles/cancer-waiting-times</p>
Internet address	<p>https://www.health-ni.gov.uk/topics/doh-statistics-and-research</p>
Authors	<p>Jennifer Finlay, Mary Farrelly & Siobhán Morgan</p>
Publication Date	<p>Wednesday 8th January 2019</p>
Reporting Period	<p>1st July 2019 – 30th September 2019</p>
Issued by	<p>Hospital Information Branch, Information & Analysis Directorate, Department of Health, Stormont Estate Belfast, BT4 3SQ</p>
Target audience	<p>Department of Health (DoH), Chief Executives of the Board and Trusts in Northern Ireland, health care professionals, academics, Health & Social Care stakeholders, media and general public.</p>

62 Day Ministerial Target

At least 95% of patients should begin their first treatment for cancer within 62 days following an urgent GP referral for suspect cancer.

In September 2019, 390 patients commenced their first treatment for cancer following an urgent GP referral for suspect cancer, compared with 345 in August, 391 in July and 377 in September 2018 (Table 3).

The Ministerial target has not been met in the last 3 years. In September 2019, 48.2% of patients commenced their first treatment for cancer within 62 days of an urgent GP referral for suspect cancer, compared with 56.8% in

August, 52.4% in July and 62.1% during September 2018 (Table 3).

Trust Performance

% of patients commencing treatment for cancer within 62 days

All HSC Trusts failed to meet the 62 day component of the Ministerial target during April, May or June months (Table 1).

Waits over 62 Days by Tumour Site

Of the 202 patients waiting longer than 62 days for treatment in September 2019, over a third (76, 37.6%) were diagnosed with urological cancer (Table 2).

31 Day Ministerial Target

At least 98% of patients diagnosed with cancer should receive their first definitive treatment within 31 days of a decision to treat.

In September 2019, 909 patients commenced their first treatment for cancer following a decision to treat, compared with 843 in August, 943 in July and 890 in September 2018 (Table 6).

The Ministerial target has not been met in the last 3 years. In September 2019, 91.4% of patients were treated within 31 days compared with 93.8% in August, 91.0% in July and 91.7% during September 2018

(Table 6).

Trust Performance

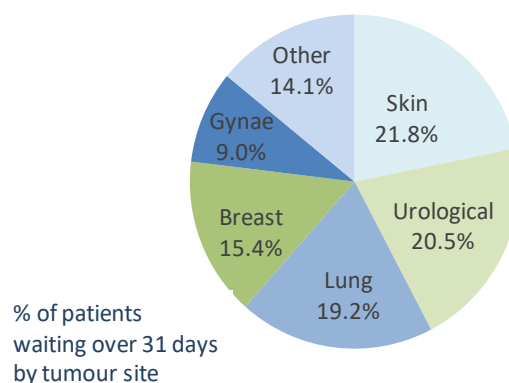

% of patients commencing treatment for cancer within 31 days

The Southern and Western HSC Trusts achieved the 98% Ministerial target in July and September (Table 4).

Waits over 31 Days by Tumour Site

Of the 78 patients waiting longer than 31 days in September, over a fifth were diagnosed with skin cancer (17, 21.8%) and urological cancer (16, 20.5%) (Table 5).

% of patients waiting over 31 days by tumour site

14 Day Ministerial Target

All urgent breast cancer referrals should be seen within 14 days.

In September 2019, 1,224 patients were first seen by a breast cancer specialist following an urgent referral for suspect breast cancer, compared with 1,203 in August, 1,287 in July and 1,100 during September 2018 (Table 8).

100% TARGET

The ministerial target has not been met in the last 18 months. In September 2019, 95.8% of patients were first seen within 14 days, compared with 77.1% in August, 80.5% in July and 74.5% during September 2018 (Table 8).

Trust Performance

The Belfast and South Eastern HSC Trusts achieved the 100% Ministerial target in July, August and September. Southern and Western HSCT Trusts achieved this target in two months of the quarter (Table 7).

Breast cancer referrals

Information in this section relates to the number of referrals received by HSC Trusts for suspect breast cancer. This information is sourced from the Patient Administration System via the HSC Data Warehouse.

Readers should note that these data are not National Statistics but have been validated and quality assured by HSC Trusts prior to publication. Currently the Department is in the process of refining validation processes for these data, which should therefore be treated with caution. However, they have been published to help provide users with some contextual information in relation to the Ministerial Target relating to breast cancer waiting times.

New Suspect Breast Cancer Referrals

In September 2019, 2,087 new referrals for suspect breast cancer were received; this compares with 1,796 in August, 1,900 in July and 1,740 in September 2018 (Table 9). Referrals for suspect cancer can be for advice, assessment or both.

New Urgent Suspect Breast Cancer Referrals

Of those new referrals for suspect breast cancer in September, 1,468 (70.3%) were classified as urgent.

Number of New Referrals Received For Suspect Breast Cancer

Additional Tables

Table 1: Percentage of patients who commenced first treatment within 62 days following an urgent GP referral for suspect cancer, in Northern Ireland (July - September 2019)¹

⁷Refer to Explanatory Notes – points 1 & 14

Appendix 1: Explanatory Notes

1. The sources for the data contained in this release are the Outpatient Universe, Cancer Patient Pathway System (CaPPS) and Patient Administration System (PAS).
2. The draft 2019/20 Ministerial Target for cancer waiting times, as detailed in the Health and Social Care (Commissioning Plan) Direction (Northern Ireland) 2019, states that during 2019/20, (i) at least 95% of patients should begin their first treatment for cancer within 62 days following an urgent GP referral for suspect cancer; (ii) at least 98% of patients diagnosed with cancer should receive their first definitive treatment within 31 days of a decision to treat; and (iii) all urgent breast cancer referrals should be seen within 14 days.
3. Data contained in Tables 1, 2, and 3 relate to patients who received a first definitive treatment for cancer (having been given an 'International Classification of Diseases 10' (ICD 10) diagnosis) during each of the three months covered in the publication, following an urgent referral for suspect cancer from a General Practitioner or a routine GP referral that has subsequently been reclassified as urgent by a cancer specialist. Data for all cancers are included with the exception of basal cell carcinoma. Figures also include all patients living outside Northern Ireland and all privately funded patients treated in Health and Social Care hospitals in Northern Ireland. Referrals from sources other than a GP, routine referrals and patients who have not been given an ICD 10 diagnosis are excluded.
4. The completed waiting time in Tables 1, 2, and 3 is measured from the date an initial urgent GP referral for suspect cancer is received by the Provider Health and Social Care Trust and ends on the date the patient receives their first definitive treatment for cancer. Adjustments are made to the completed waiting time in the event of a patient cancelling or self-deferring treatment or as a result of suspension for either medical or social reasons.
5. The measurement of a patient's waiting time in Tables 1, 2, and 3 include cases in which a patient was initially referred to a particular Health and Social Trust for consultant assessment but was then subsequently transferred to another Health and Social Care Trust for treatment. In such cases, the responsibility for that patient is shared, with 0.5 allocated to the Trust where the patient was first assessed and 0.5 to the Trust of first treatment. For example, if a patient is initially referred for assessment in the South Eastern HSC Trust and is then transferred to the Belfast HSC Trust where they receive treatment 70 days after their initial GP referral, both the South Eastern and Belfast HSC Trusts will report 0.5 of a patient treated who waited over 62 days.
6. Table 2 reflects the number of patients that were treated in 62 days or less for each tumour site. Tumour sites are an aggregation of applicable ICD 10 codes.
7. Between April 2008 and February 2009, the target relating to waiting time for treatment following an urgent GP referral for suspect cancer required that 'at least 75% of patients urgently referred with a suspect cancer should begin their first definitive treatment within 62 days of urgent GP referral'. From March 2009 onwards this target increased to 95% of patients.
8. Data contained in Tables 4, 5, and 6 relate to all patients who received a first definitive treatment for cancer (having been given an ICD 10 diagnosis) during each of the three months covered in the publication, irrespective of their source or type of referral. Data include treatment for all cancers, with the exception of basal cell carcinoma. Figures also include all patients living outside Northern Ireland and all privately funded patients

treated in Health and Social Care hospitals in Northern Ireland. Patients that have not been given an ICD 10 diagnosis are excluded.

9. The completed waiting time in Tables 4, 5, and 6 is measured from the date a decision is taken to treat a patient for cancer and ends on the date the patient receives their first definitive treatment for cancer. The decision to treat is the date on which the patient and the clinician agree the planned treatment. Adjustments are made to the completed waiting time in the event of a patient cancelling or self-deferring treatment or as a result of suspension for either medical or social reasons.

10. Table 5 reflects the number of patients that were treated in 31 days or less for each tumour site. Tumour sites are an aggregation of applicable ICD 10 codes.

11. Data contained in Tables 7 and 8 relate to all urgent referrals (excluding those that have been reclassified as routine by the breast specialist) for suspect breast cancer, and routine referrals that have subsequently been reclassified as urgent by a breast specialist that were first seen during each of the three months covered in the publication. Figures also include patients living outside Northern Ireland and all privately funded patients seen in Health and Social Care hospitals in Northern Ireland.

12. The completed waiting time in Tables 7 and 8 is measured from the date an initial breast cancer referral is first received by the Provider HSC Trust, and ends on the date that the patient attends their first outpatient appointment with a breast cancer specialist. Adjustments are made to the completed waiting time in the event of a patient cancelling, self-deferring or failing to attend a first outpatient appointment.

13. Figures provided in Tables 7 and 8 reflect all urgent referrals for breast cancer both from GP's and other practitioners.

14. Figures provided in the Breast Cancer Referrals section reflect all new referrals received for suspect breast cancer irrespective of their source of referral.

15. Information on the grouping of ICD 10 codes by tumour site is available at the following link: <https://www.health-ni.gov.uk/articles/cancer-waiting-times>

16. HIB surveyed data providers during 2011/12 to ascertain the cost of producing, validating and submitting the information required for this publication. This relates to the time taken to generate, validate and submit data, over and above what is already required by their organisation for internal performance management purposes. The cost to data providers of compliance with HIB's requirements for this publication, based on HSC salary costs, was £2,378.

17. Monthly data relating to cancer waiting times have also been presented in spreadsheet format (Microsoft Excel), split by HSC Trust, and where applicable tumour site, in order to aid secondary analysis. These data are available at the following link: <https://www.health-ni.gov.uk/articles/cancer-waiting-times>

18. Information on waiting times for the months of October, November and December 2019 will be published on Thursday 26th March 2020.

19. Data contained within this publication are National Statistics except for breast cancer referrals which are currently statistics in development.

Further information on cancer waiting times in Northern Ireland, is available from:
