Northern Ireland Termination of Pregnancy Statistics, 2017/18

Key Points

- There were 12 terminations of pregnancy in HSC hospitals in Northern Ireland during 2017/18. This was one less than the 13 reported in 2016/17 (Table 1). It should be noted that due to small numbers, relatively large fluctuations may be expected from year to year.
- All of the 12 terminations of pregnancy during 2017/18 were carried out on women normally resident in Northern Ireland (Table 3).
- During 2017/18 there were 8 terminations of pregnancy carried out on women aged 30 years and over, 4 terminations of pregnancy carried out on women aged 25 to 29, and none on women aged 24 and under (Table 4).

Tables

The way in which a medical abortion is defined was amended from 1st April 2013, following an update to the National Clinical Coding Standards, which apply across the UK. Definitions currently applicable and those applicable prior to 1st April 2013 are detailed in Appendix 1.

Table 1: Medical abortions and terminations of pregnancy, 2007/08 to 2017/18

Year	Medical Abortion	Termination of Pregnancy
2007/08	76	47
2008/09	71	44
2009/10	64	36
2010/11	73	43
2011/12	56	35
2012/13	75	51
2013/14 ^B	25	23
2014/15	22	16
2015/16	30	16
2016/17	20	13
2017/18	32	12

^B Break in series.

Figures for medical abortion prior to 1st April 2013 included readmissions with retained products of conception, following a missed miscarriage or a spontaneous abortion that had been treated in the first admission with an evacuation of the products of conception. These are no longer part of the definition of medical abortion.

It should be noted that from the 1st April 2013 retained products of conception in the same episode as the termination that required surgical treatment must be considered a complete termination of pregnancy.

Terminations of pregnancy are unaffected by the definitional change.

Please refer to Appendix 1 (p.4) for further detail.

Table 2: Terminations of pregnancy by HSC Trust of treatment, 2007/08 to 2017/18

Year	Belfast	Northern	South Eastern	Southern	Western	Total
2007/08	18	12	12	*	*	47
2008/09	13	*	16	*	*	44
2009/10	*	*	12	*	*	36
2010/11	14	12	*	*	*	43
2011/12	15	*	13	*	*	35
2012/13	13	11	17	*	*	51
2013/14	14	*	*	*	*	23
2014/15	12	*	*	*	*	16
2015/16	*	*	*	*	*	16
2016/17	7	*	*	*	*	13
2017/18	8	*	*	*	*	12

Appendix 1 – Definitions

The way in which a medical abortion is defined was amended for activity from 1st April 2013, following an update to the National Clinical Coding Standards on termination of pregnancy.

The National Clinical Coding Standards ICD-10 4th Edition reference book provides specific national clinical coding standards to reduce ambiguity and differences in any interpretation. It incorporates all changes notified in the National Clinical Coding Standards ICD-10 4th Edition Addendum 2013. This was published in August 2013 following a public consultation on the changes (carried out by the Health and Social Care Information Centre, England), which closed in January 2013.

Current definitions, applicable throughout the UK from 1st April 2013.

All HSC Trusts in Northern Ireland have confirmed that the below definitions have been applied from 1st April 2013 in the identification of medical abortions and terminations of pregnancy.

Medical Abortion

Within the confines of ICD-10 code O04, this refers to the interruption of a live pregnancy for legally acceptable, medically approved indications. It also includes readmission with retained products of conception following a previous medical termination of pregnancy.

Termination of pregnancy (medical)

This is defined as any patient who has a live pregnancy terminated for indications that are legally acceptable and medically approved in Northern Ireland. Medical termination of pregnancy is a subset of medical abortion.

Definitions applicable throughout the UK prior to 1st April 2013.

All HSC Trusts used the below definitions to identify medical abortions and terminations of pregnancy during the period 2007/08 to 2012/13.

Medical Abortion

Within the confines of ICD-10 code O04, this refers to the interruption of a live pregnancy for legally acceptable, medically approved conditions. It also includes readmissions with retained products of conception following a previous termination of pregnancy, a missed miscarriage or a spontaneous abortion that had been treated in the first admission with an evacuation of the products of conception and a patient who had a termination of pregnancy and had retained products of conception in the same episode that required surgical treatment.

Termination of pregnancy (medical)

This is defined as any patient who has a live pregnancy terminated for indications that are legally acceptable and medically approved in Northern Ireland. Medical termination of pregnancy is a subset of medical abortion.

Summary of definitional changes from 1st April 2013

Readmissions with retained products of conception following a missed miscarriage or a spontaneous abortion that had been treated in the first admission with an evacuation of the products of conception are no longer part of the definition of medical abortion.

Retained products of conception in the same episode as the termination that required surgical treatment are now considered a complete termination of pregnancy.
