

Northern Ireland Quarterly Employment Survey

Theme: Labour Market

Frequency: Quarterly

Geographical area: Northern Ireland

Reference period: Quarter 2 (June) 2022

Employee jobs estimates are calculated from the Quarterly Employment Survey (QES) aspect of the Quarterly Business Survey (QBS). The QES has a sample size of approximately 6,000 and covers all employers with 25 or more employees, all public sector employers, all businesses with more than one industry activity and a representative sample of smaller firms.

The survey date for Quarter 2 was 30th May 2022. All figures are adjusted for seasonality, unless stated otherwise.

Key Points

- Latest estimates show the number of employee jobs reached a series high in June 2022 of 797,840. This was an increase of 3,560 jobs (+0.4%) over the quarter and 27,860 jobs (+3.6%) over the year compared to June 2021. It should be noted that June 2021 marked a low employee jobs estimate over the pandemic period.
- June 2022 estimates showed that employee jobs are 2.2% (+17,390 jobs) above the pre-pandemic December 2019 level.
- June 2022 marked the fifth consecutive quarterly increase in employee jobs, following five previous quarters of decline.
- In the last five years, employee jobs have increased by 6.3% (+47,380 jobs). There has been an increase of 15.5% (+106,830 jobs) from the low in March 2012.
- In June 2022 the services sector reached a new series high of 648,930 jobs.
- Quarterly increases in employee jobs were seen within the services (+4,120 jobs) and construction (+1,040 jobs) sectors to June 2022. The manufacturing (-1,560 jobs) and other industries (-40 jobs) sectors reported a decrease over the quarter.
- The services (+23,280 jobs), construction (+2,690 jobs) and manufacturing (+2,010 jobs) sectors increased over the year to June 2022. The other industries sector reported a slight decrease of 110 jobs over the year.
- Private sector jobs reached a new series high in June 2022. Private sector jobs increased over both the quarter (+0.8% or +4,830 jobs) and the year (+4.0% or +22,480 jobs) to 578,640 jobs in June 2022. Public sector jobs also increased over both the quarter (+0.3% or +740 jobs) and the year (+2.6% or +5,600 jobs) to 220,610 jobs in June 2022.

NATIONAL STATISTICS STATUS

National Statistics status means that our statistics meet the highest standards of trustworthiness, quality and public value, and it is our responsibility to maintain compliance with these standards.

These statistics were designated as National Statistics in August 2010 following a full [assessment](#) against the [Code of Practice](#).

Since the assessment by the UK Statistics Authority, we have continued to comply with the Code of Practice for Statistics, and have made the following improvements:

- Quantified the level of uncertainty around estimates by providing confidence intervals for headline estimates;
- Removed pre-release access to enhance trustworthiness and also brought the publication date forward as a result;
- [Consulted users](#) at Labour Market User Groups and streamlined outputs in line with the UK series;
- Reduced [business burden](#) by offering the option of online data returns.
- Improved accessibility of Labour Market Statistics by [changing publication practices](#) so that reports are [no longer released on public holidays](#) and amended the format and structure of reports in line with accessibility regulations.
- Temporarily changed [timing of release](#) in line with change in ONS release practices in response to COVID-19.

1 Summary of Employee Jobs

The survey date for Quarter 2 was 30th May 2022 for Northern Ireland (NI).

Change in employee jobs

The seasonally adjusted employee jobs estimate for NI at June 2022 was 797,840 (+/- 5,600¹). This was:

- an increase of 0.4% (+3,560 jobs) over the quarter from the revised March 2022 estimate of 794,280.
- an increase of 3.6% (+27,860 jobs) over the year from the revised June 2021 estimate of 769,980.
- While the quarterly change in employee jobs was not found to be statistically significant, the change over the year from June 2021 was found to be statistically significant. It should be noted that June 2021 marked a low employee jobs estimate over the pandemic period. Comparing June 2022 to June 2020 shows a more moderate increase of 2.7% (+20,830 jobs).

Figure 1.1: Annual and Quarterly Changes in Employee Jobs at Section Level

[Download Q2-22 Data](#)

Change over the quarter

Comparing seasonally adjusted June 2022 employee jobs to the revised March 2022 estimates showed:

- an increase in the services sector of 0.6% (+4,120 jobs) to 648,930 jobs.
- an increase in the construction sector of 2.9% (+1,040 jobs) to 36,310 jobs.
- a decrease in the manufacturing sector of 1.7% (-1,560 jobs) to 88,030 jobs.
- a decrease in the other services sector of 0.1% (-40 jobs) to 24,580 jobs.

¹ Represents 95% confidence interval around estimate. More information is available in the [QES Confidence Intervals User Guidance PDF \(665KB\)](#).

Change over the year

Comparing seasonally adjusted June 2022 employee jobs to the revised June 2021 estimates showed:

- an increase in the services sector of 3.7% (+23,280 jobs) to 648,930 jobs.
- an increase in the manufacturing sector of 2.3% (+2,010 jobs) to 88,030 jobs.
- an increase in the construction sector of 8.0% (+2,690 jobs) to 36,310 jobs.
- a decrease in the other industries sector of 0.5% (-110 jobs) to 24,580 jobs.

Comparing unadjusted data over the year, estimates showed:

- (i) Education; (ii) retail trade, except of motor vehicles and motorcycles; and (iii) food and beverage service activities saw the greatest increases over the year, accounting for 35.7% of all increases in employee jobs.
- (i) Social work activities without accommodation; (ii) services to buildings and landscape activities; and (iii) repair and installation of machinery and equipment saw the greatest decreases over the year, accounting for 58.4% of all decreases in employee jobs.
- Despite the decreases, there was a net increase of 27,890 employee jobs.

Annualised change

Comparing the seasonally adjusted employee jobs data for Quarter 3 2020 – Quarter 2 2021 to Quarter 3 2021 – Quarter 2 2022 showed:

- an increase in the services sector of 2.5%.
- an increase in the manufacturing sector of 2.5%.
- an increase in the construction sector of 1.3%.
- a decrease in the other industries sector of 0.1%.

Public / private sector changes

Seasonally adjusted employee jobs estimates for the public and private sectors at June 2022 showed:

- an increase of 0.3% (+740 jobs) in the public sector over the quarter and an increase of 2.6% (+5,600 jobs) over the year to 220,610 jobs.
- an increase of 0.8% (+4,830 jobs) in the private sector over the quarter and an increase of 4.0% (+22,480 jobs) over the year to 578,640 jobs. Private sector jobs reached a series high in June 2022.

Commentary

Estimates for June 2022 showed that employee jobs have reached a series high for the third consecutive quarter. June 2022 marked the fifth consecutive quarterly increase in employee jobs, following the low point for employee job estimates throughout the pandemic in March 2021. June 2022 estimates showed that employee jobs are now above the pre-pandemic December 2019 level (+2.2% or +17,390 jobs).

Preliminary estimates from the Quarterly Employment Survey (QES) showed that NI (seasonally adjusted) employee jobs increased over the quarter (+0.4% or +3,560 jobs) to 797,840 jobs in June 2022. The quarterly increase in employee jobs in June 2022 was largely driven by the services industry sector (+4,120 jobs). The construction (+1,040 jobs) sector also reported a quarterly increase in employee jobs. The manufacturing (-1,560 jobs) and other industries (-40 jobs) sectors both reported a decrease over the quarter to June 2022. The services sector reached a new series high in June 2022 (648,930).

Seasonally adjusted employee jobs increased over the year to June 2022 (+3.6% or +27,860 jobs). June 2022 marked the fourth quarterly annual increase after four consecutive quarters of annual decline. The annual increase in June 2022 was mainly driven by the services industry sector (+23,280 jobs).

Figure 1.2: Seasonally Adjusted Jobs in NI, June 2007 – June 2022

[Download Q2-22 Data](#)

Public sector jobs increased over both the quarter (+0.3% or +740 jobs) and the year (+2.6% or +5,600 jobs). Public sector jobs have been on a gradually increasing trend since September 2016, although they are still 3.3% (-7,560 jobs) lower than the series peak in September 2009. Private sector jobs also increased over the quarter (+0.8% or +4,830 jobs) and the year (+4.0% or +22,480 jobs) reaching a series high 578,640 jobs. Since June 2021, private sector jobs have increased each quarter following a period of decline throughout the COVID-19 pandemic.

The UK also reported increases in employee jobs over the quarter (+0.8%) and the year (+3.0%) to 31.49 million jobs in June 2022.

Context

This bulletin presents data from the Northern Ireland Quarterly Employment Survey (QES), which is conducted by the Economic & Labour Market Statistics (ELMS) Branch of the Northern Ireland Statistics & Research Agency (NISRA).

The survey date for Quarter 2 was 30th May 2022 for NI.

The QES provides short-term employee jobs estimates for NI and covers all employers with 25 or more employees, all public sector employers, all businesses with more than one industry activity and a representative sample of smaller firms. As it is a sample survey, estimates are subject to sampling variability.

The QES excludes the self-employed, HM Armed Forces, private domestic servants, homeworkers and Skills for Life and Work and Traineeship programme trainees without a contract of employment (non-employed status). The survey collects information on the number of males/females in full-time and part-time employment by business activity and the results are collated into industry classes using the 2007 Standard Industrial Classification (SIC07). The number of jobs are counted rather than the number of persons with jobs. For example, a person holding both a full-time job and part-time job, or someone with two part-time jobs, will be counted twice.

All figures included in the QES are adjusted for seasonality, unless stated otherwise, where the seasonally adjusted series started in 2005. It should be noted that from Quarter 2 2020 to Quarter 3 2021 the QES estimates included those who were furloughed under the [Coronavirus Job Retention Scheme \(CJRS\)](#).

Figures from the QES are included in the [Labour Market Report](#) alongside figures from the Labour Force Survey (LFS), the Claimant Count, the Annual Survey of Hours and Earnings (ASHE) and redundancies data.

QES employee jobs are also a component of the Office for National Statistics (ONS) quarterly [workforce jobs estimates](#) for the UK.

QES employee jobs are included in the [DfE Economic Commentary](#) which provides an overview of the state of the NI economy, setting it in context with the UK and Republic of Ireland. The most up-to-date official statistics on the economy and labour market are available on the [Economic Overview section](#) of the website.

Results are provisional and subject to revisions as more up-to-date data becomes available (e.g. through late returns). Figures can also change as a result of the seasonal adjustment process, methodological changes or changes to classifications. Further information is available from the [Quarterly Employment Survey Revisions page](#).

2 NI Employee Jobs

Employee: anyone aged 16 years or over that is directly paid from a business's payroll for carrying out a full-time or part-time job or being on a training scheme in Northern Ireland. The QES counts the number of jobs rather than the number of persons with jobs.

Key Findings:

- Employee jobs increased both over the quarter (+0.4% or +3,560 jobs) and the year (+3.6% or +27,860 jobs) to 797,840 in June 2022, reaching a series high.
- In June 2022, the services sector reached a series high (648,930).

Figure 2.1: Index of Employee Jobs, June 2007 – June 2022

[Download Q2-22 Data](#)

Figure 2.1 shows estimated seasonally adjusted employee jobs, indexed to allow comparison between NI and the UK. June 2022 marked the third consecutive quarter of positive annualised change¹ (+2.4%) in NI jobs following four consecutive quarters of decline. NI employee jobs increased over the year (+3.6%). The UK also reported an increase in employee jobs (+3.0%) over the year to reach a series high in June 2022. Following the 2008 downturn, the UK reached its lowest point in December 2010, more than a year before the NI low in March 2012. NI jobs are now 15.5% above the low point in March 2012 while UK jobs are 15.3% above their December 2010 level.

¹Annualised change is calculated as the difference in the average of the most recent 4 quarters and the previous 4 quarters average, as a proportion of the average of the previous 4 quarters. See Section 6 for further information.

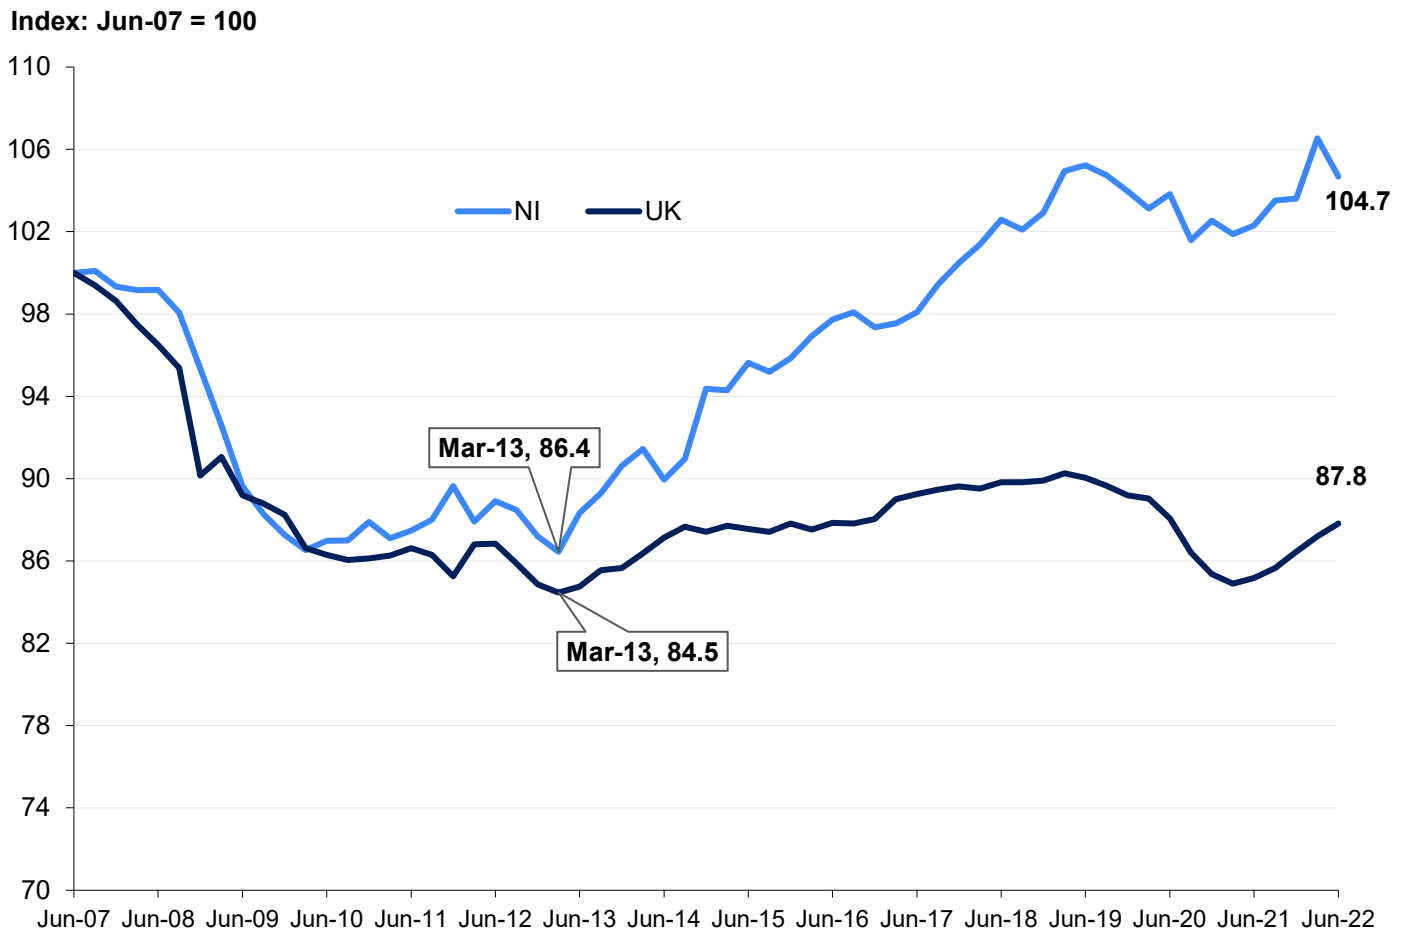

Manufacturing sector

Manufacturing sector: contains businesses which produce merchandise for use or sale. It also contains businesses with activity of printing and reproduction of recorded media and businesses that repair and install machinery and equipment. Manufacturing is part of the broader production sector.

Key Findings:

- The manufacturing sector accounted for 11.0% of all employee jobs in June 2022.
- Seasonally adjusted figures showed an decrease of 1.7% over the quarter and an increase of 2.3% over the year to 88,030 manufacturing jobs in June 2022.

Figure 2.2: Index of manufacturing employee jobs, June 2007 – June 2022

[Download Q2-22 Data](#)

Manufacturing jobs in NI experienced a decrease over the quarter to June 2022 (-1.7% or 1,560 jobs). Both NI and the UK reached a series low in March 2013. Manufacturing jobs in NI are currently 21.1% (+15,340 jobs) above the March 2013 low point. The UK manufacturing sector has experienced its fifth consecutive quarter of increase in employee jobs to March 2022, following eight previous consecutive quarters of decline.

Key Findings

Seasonally adjusted data showed that the manufacturing sector decreased by 1.7% (-1,560 jobs) over the quarter but increased by 2.3% (+2,010 jobs) over the year to 88,030 jobs in June 2022.

The following breakdowns are based on 2 digit SIC manufacturing data that have not been adjusted for seasonality. Please note that estimates at 2 digit SIC can fluctuate due to sampling variability and changes to industrial classification.

Changes over the year

Over the year to June 2022 the unadjusted figures showed an increase of 2.3% (+1,970 jobs) in the manufacturing sector. The 3 largest increases were:

- an increase of 5.1% (+1,070 jobs) in manufacture of food products.
- an increase of 21.5% (+590 jobs) in manufacture of motor vehicles, trailers and semi-trailers.
- an increase of 2.4% (+180 jobs) in manufacture of machinery and equipment n.e.c.

The increase over the year was partially offset by some decreases in manufacturing subsectors; the 3 largest decreases over the year being:

- a decrease of 27.3% (-510 jobs) in repair and installation of machinery and equipment.
- a decrease of 11.9% (-290 jobs) in manufacture of textiles.
- a decrease of 5.6% (-140 jobs) in manufacture of electrical equipment.

For figures broken down by 2 digit SIC please see table 5.10 on the NISRA - [Economic and Labour Market Statistics website](#).

When using table 5.10 please consider the notes on 'Using 2 Digit SIC Level Data' in section 6 – Further Info.

Construction sector

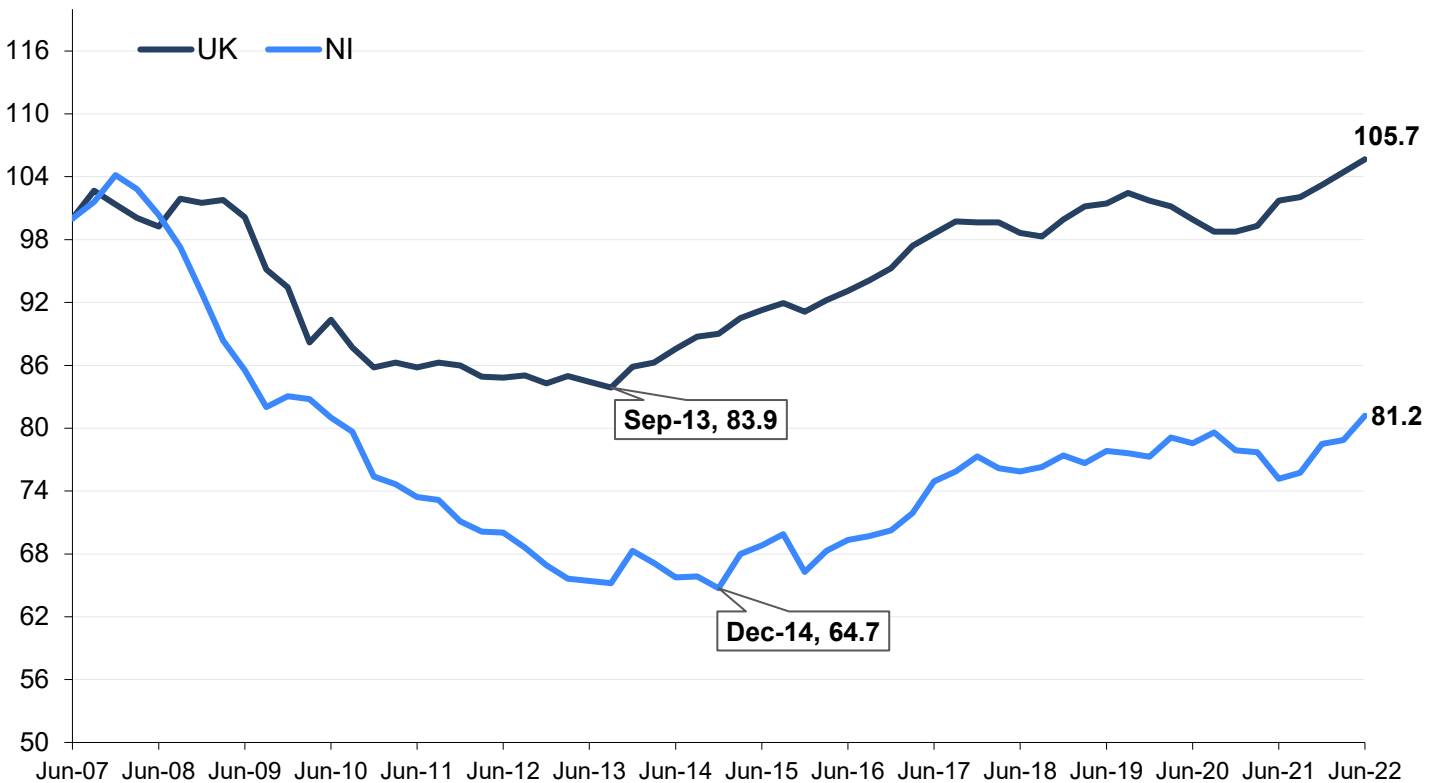

Construction sector: construction is the process of creating and building infrastructure or a facility. It differs from manufacturing in that manufacturing typically involves mass production of similar items without a designated purchaser and construction is typically done on location for a known client. The construction sector consists of businesses with activity in the construction of buildings, civil engineering or specialised construction activities.

Key Findings:

- The construction sector accounted for 4.6% of all employee jobs in June 2022.
- Seasonally adjusted figures showed an increase of 2.9% over the quarter and an increase of 8.0% over the year to 36,310 jobs in June 2022.

Figure 2.3: Index of construction employee jobs, June 2007 – June 2022

Index: Jun-07 = 100

[Download Q2-22 Data](#)

Employee jobs showed an increase over the quarter to June 2022 (2.9% or +1,040 jobs) and showed an increase over the year (8.0% or +2,690 jobs). The most recent series low in the NI construction sector was in December 2014 (28,940 jobs). The latest estimates show a 25.4% improvement on this level; however, the number of employee jobs in the NI construction sector remains 22.1% lower than the series peak in December 2007. Most recent estimates show that the UK construction sector has reached a series high in June 2022 and is now 26.0% above the series low in September 2013.

Key Findings

Seasonally adjusted data showed that the construction sector increased by 2.9% (+1,040 jobs) over the quarter and increased 8.0% (+2,690 jobs) over the year to 36,310 jobs in June 2022.

The following breakdowns are based on 2 digit SIC construction data that have not been adjusted for seasonality. Please note that estimates at 2 digit SIC can fluctuate due to sampling variability and changes to industrial classification.

Changes over the year

Over the year to June 2022 the unadjusted figures showed an increase of 7.9% (+2,660 jobs) in the construction sector.

The following changes occurred over the year:

- an increase of 10.5% (+1,800 jobs) in specialised construction activities.
- an increase of 7.7% (+580 jobs) in construction of buildings.
- an increase of 3.2% (+290 jobs) in civil engineering.

For figures broken down by 2 digit SIC please see table 5.10 on the NISRA - [Economic and Labour Market Statistics website](#).

When using table 5.10 please consider the notes on 'Using 2 Digit SIC Level Data' in section 6 – Further Info.

Services sector

Services sector: the services sector contains businesses which sell services and skills; and includes education, public administration and health and social work activities. A full list of the industry sections G-S which are included in the services sector can be found in table 5.5 within the supplementary tables on the [Economic and Labour Market Statistics website](#).

Key Findings:

- Seasonally adjusted figures showed increases of 0.6% over the quarter and 3.7% over the year to 648,930 service sector jobs in June 2022.
- Services sector jobs reached a fourth successive peak in June 2022.
- The services sector accounted for 81.3% of all employee jobs in NI in June 2022.

Figure 2.4: Index of services employee jobs, June 2007 – June 2022

[Download Q2-22 Data](#)

Services jobs in NI experienced an increase over the quarter to June 2022 (+0.6% or +4,120 jobs) to reach a fourth successive series high. The number of employee jobs in the NI services sector has increased by 37,010 over the last 5 years. There has been an increase of 14.8% in employee jobs in the services sector since the low in December 2011.

The UK also experienced increases in service sector jobs over the quarter (+0.8%) and over the year (+3.1%) to reach a series high in June 2022.

Key Findings

Seasonally adjusted data showed that the services sector increased by 0.6% (+4,120 jobs) over the quarter and by 3.7% (+23,280 jobs) over the year to 648,930 jobs in June 2022.

The following breakdowns are based on 2 digit SIC services data that have not been adjusted for seasonality. Please note that estimates at 2 digit SIC can fluctuate due to sampling variability and changes to industrial classification.

Changes over the year

Over the year to June 2022 the unadjusted figures showed an increase of 3.7% (+23,380 jobs) in the services sector. The 3 largest contributors to this increase over the year were:

- an increase of 5.5% (+4,150 jobs) in education.
- an increase of 4.5% (+3,750 jobs) in retail trade, except of motor vehicles and motorcycles.
- an increase of 8.7% (+3,320 jobs) in food and beverage service activities.

The overall increase was partially offset by some decreases in services subsectors, the 3 largest decreases over the year being:

- a decrease of 2.2% (-780 jobs) in social work activities without accommodation.
- a decrease of 7.3% (-760 jobs) in services to buildings and landscape activities.
- a decrease of 9.9% (-230 jobs) in gambling and betting activities.

For figures broken down by 2 digit SIC please see table 5.10 on the NISRA - [Economic and Labour Market Statistics website](#).

When using table 5.10 please consider the notes on 'Using 2 Digit SIC Level Data' in section 6 – Further Info.

Other industries sector

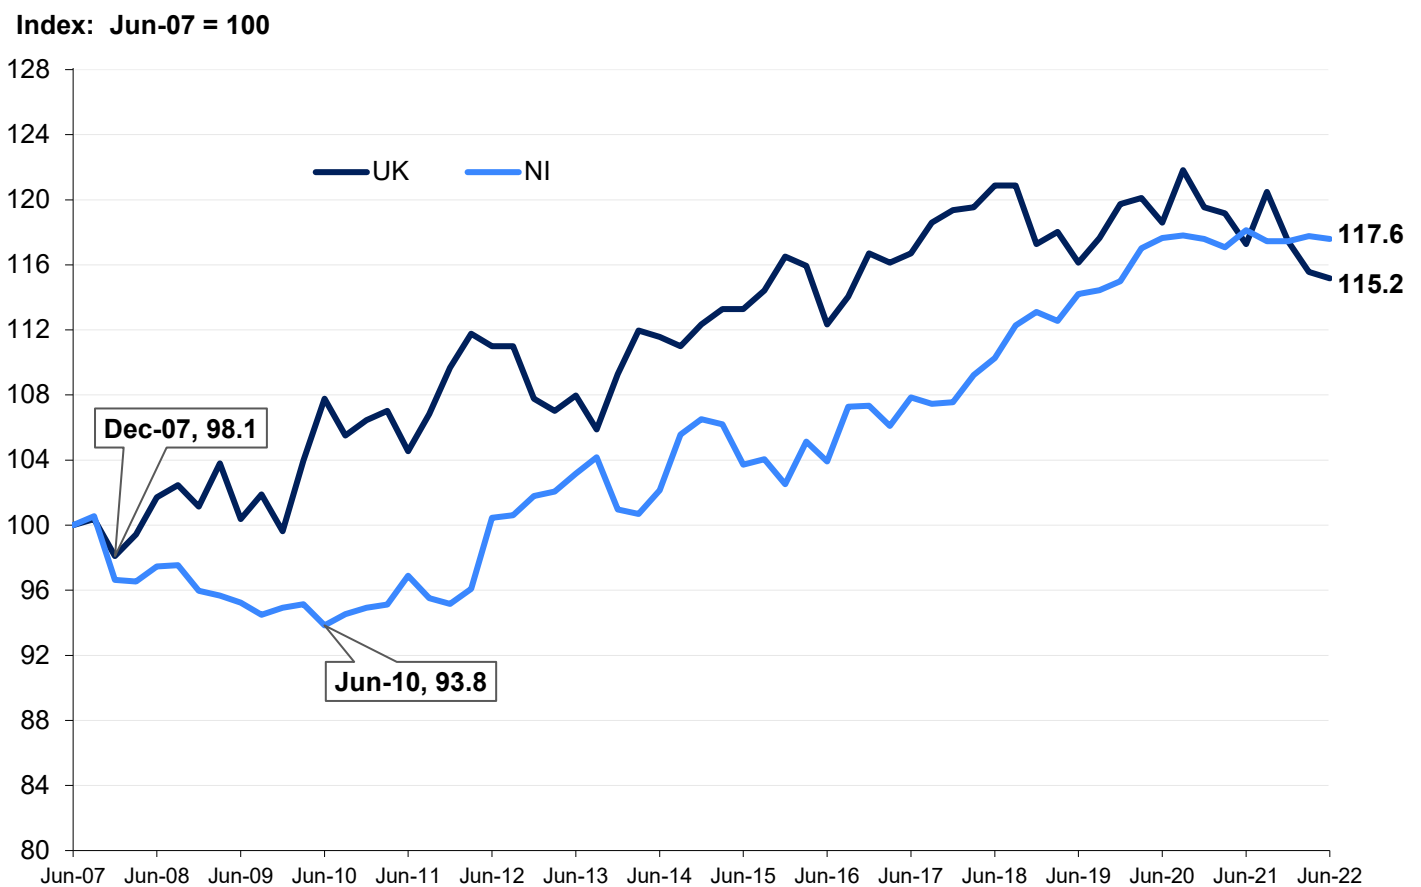

Other industries sector: this sector contains businesses with activity in agriculture, forestry and fishing, mining and quarrying, electricity, gas, steam and air conditioning supply and water supply, sewerage, waste management and remediation activities (industry sections A,B,D and E).

Estimates from the annual Farm Census are included in industry section A (accounting for approximately 90% of the employee jobs in the section). The Farm Census figures are published annually in January and relate to the previous June.

Key Findings:

- **Seasonally adjusted figures showed a decrease of 0.1% over the quarter and of 0.5% over the year to 24,580 other industries sector jobs in June 2022.**
- **The other industries sector made up 3.1% of all employee jobs in June 2022.**

Figure 2.5: Index of other industries sector jobs, June 2007 – June 2022

[Download Q2-22 Data](#)

Over the last 10 years the other industries sector in NI and the UK increased overall. The number of employee jobs in the NI other industries sector increased by 3,580 (+17.1%) over the 10 year period to June 2022. UK other industry jobs increased by 22,000 over the same period (3.8%).

Key Findings

Seasonally adjusted data showed that the other industries sector decreased by 0.1% (-40 jobs) over the quarter and by 0.5% (-110 jobs) over the year to 24,580 jobs.

The following breakdowns are based on 2 digit SIC other industries data that have not been adjusted for seasonality. Please note that estimates at 2 digit SIC can fluctuate due to sampling variability and changes to industrial classification.

Changes over the year

Over the year to June 2022 the unadjusted figures showed a decrease of 0.5% (-120 jobs) in the other industries sector. The 3 largest contributors to this decrease over the year were:

- a decrease of 1.3% (-170 jobs) in crop and animal production, hunting and related service activities.
- a decrease of 22.5% (-60 jobs) in fishing and aquaculture.
- a decrease of 3.0% (-60 jobs) in other mining and quarrying.

The overall decrease was partially offset by some increases in other industries subsectors, the 3 largest increases over the year being:

- an increase of 1.3% (+70 jobs) in waste collection, treatment and disposal activities; materials recovery.
- an increase of 26.6% (+50 jobs) in remediation activities and other waste management services.
- an increase of 3.7% (+50 jobs) in water collection, treatment and supply.

For figures broken down by 2 digit SIC please see table 5.10 on the NISRA - [Economic and Labour Market Statistics website](#).

When using table 5.10 please consider the notes on 'Using 2 Digit SIC Level Data' in section 6 – Further Info.

3 Public/Private Sector Employee Jobs

Public sector: the NI public sector can be broken down into five areas:

1. NI central government
2. Bodies under aegis of NI central government
3. UK central government employees based in Northern Ireland
4. Local government
5. Public corporations

Private sector: the private sector encompasses all for-profit businesses (not owned or operated by the government) and the voluntary sector; which includes charities and other non-profit organisations.

Key Findings:

- The NI public sector made up 28% and the private sector made up 72% of all employee jobs in June 2022. NI public sector jobs as a proportion of the NI population¹ was 12%. This compares to 9% in the UK.
- Seasonally adjusted employee jobs in the private sector increased over both the quarter and the year to 578,640 jobs. Private sector jobs reached a new series high in June 2022.
- Seasonally adjusted employee jobs in the public sector increased over both the quarter and the year to 220,610 jobs.

Figure 3.1: Index of NI Public and Private Sector Jobs, June 2007 – June 2022

[Download Q2-22 Data](#)

The latest seasonally adjusted employee jobs figures estimate that there were:

- 578,640 employee jobs in the NI private sector.
- 220,610 employee jobs in the NI public sector.

¹ Latest population estimate available – [March 2021](#).

Changes over the quarter

The latest seasonally adjusted figures represented:

- an increase of 0.8% (+4,830 jobs) in the private sector.
- an increase of 0.3% (+740 jobs) in the public sector.

Changes over the year

The latest seasonally adjusted figures represented:

- an increase of 4.0% (+22,480 jobs) in the private sector.
- an increase of 2.6% (+5,600 jobs) in the public sector.

June 2022 marked the fourth consecutive quarterly annual increase in private sector jobs, following five consecutive quarters of annual decline. Private sector jobs have increased 6.3% (+34,470 jobs) in the last five years and private sector jobs are now at a series high.

Following a period of annual decline in public sector employee jobs between June 2015 and June 2017, there has been continuous growth in public sector jobs from September 2017 to June 2022. However, there are 7,560 fewer public sector jobs (-3.3%) than the series peak in September 2009.

4 Composition of Employee Jobs

Please note: data in this section have not been adjusted for seasonality.

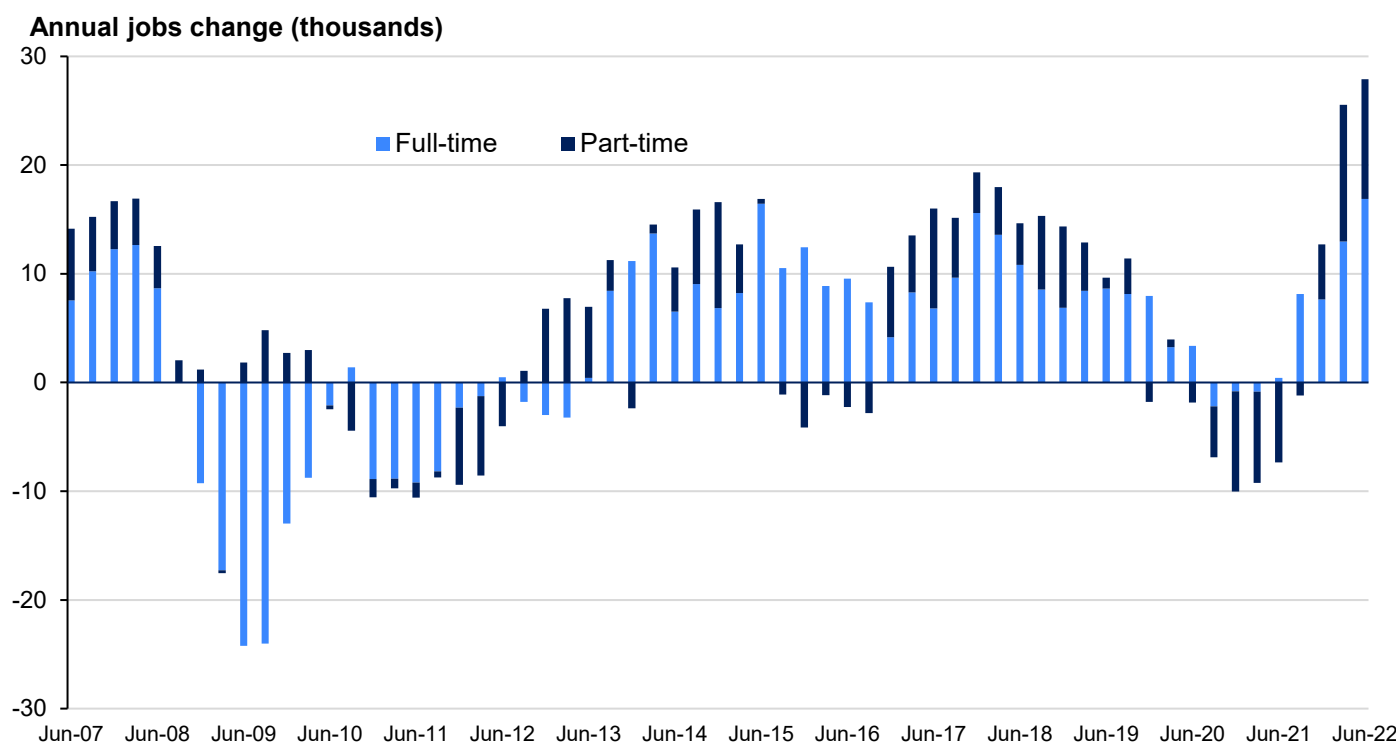

Part-time: part-time means those who normally work 30 hours a week or less.

Full-time: full-time means those who normally work more than 30 hours a week.

Key Findings

- The number of full-time jobs increased (+1.3% or +7,040 jobs) over the quarter to June 2022 while the number of part-time jobs decreased by 1.3% or -3,650 jobs.
- Over the year to June 2022, both full-time (+3.3% or +16,890 jobs) and part-time jobs (+4.3% or +11,000 jobs) increased.
- Full-time jobs reached a new series high in June 2022.
- Part-time jobs accounted for 34% of all employee jobs in June 2022.

Figure 4.1: Full-time and part-time jobs annual change, June 2007 – June 2022

[Download Q2-22 Data](#)

The latest estimates showed that:

- Part-time jobs increased by 11.3% (+27,220 jobs) since the most recent low point in March 2012.
- The low point for full-time jobs was a year later (March 2013) than for part-time jobs. The number of full-time jobs has increased by 18.8% (+83,520 jobs) since this point.

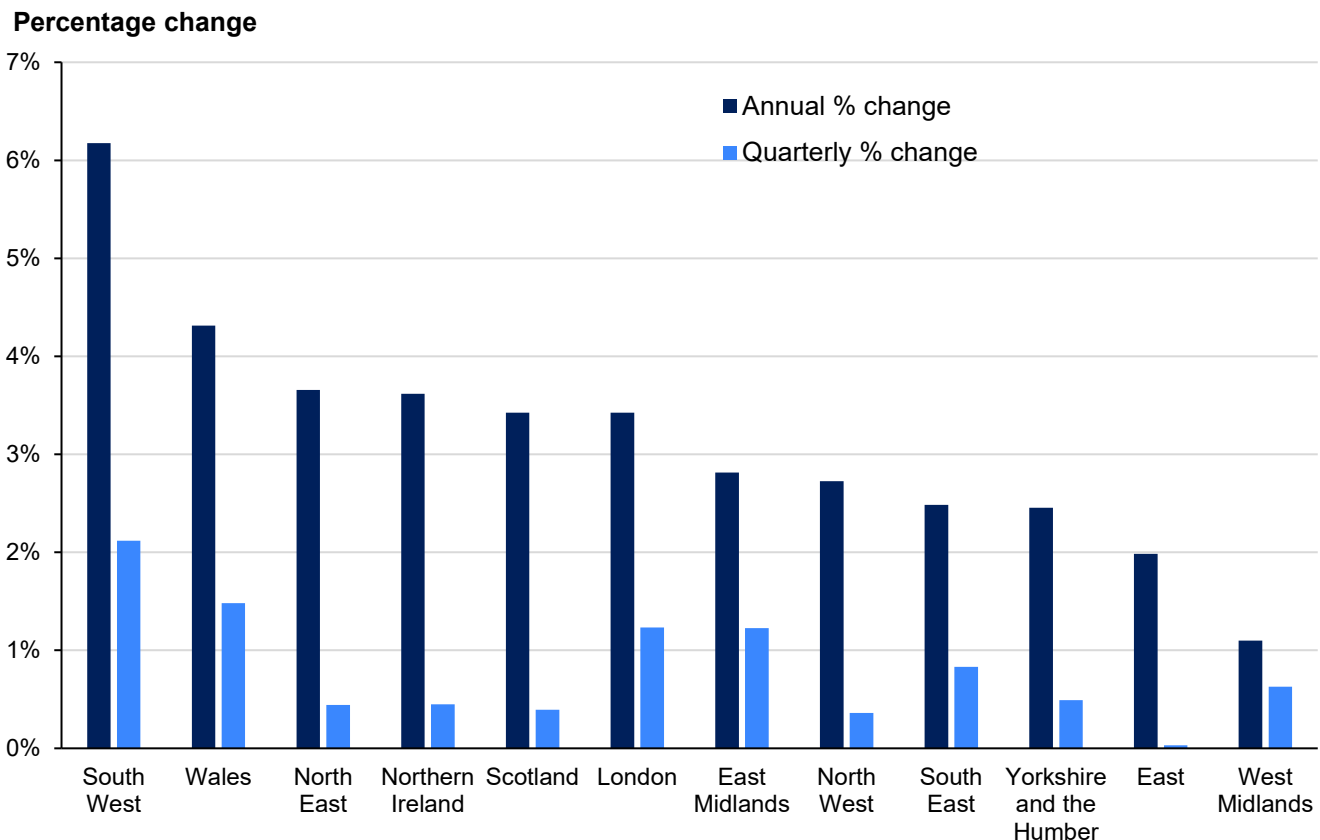

5 UK Comparisons

Employee jobs figures for GB regions are provided by the Office for National Statistics (ONS). ONS produces a publication on [Workforce Jobs by region](#). Unlike QES, Workforce Jobs include employee jobs, self-employed, government supported trainees and Her Majesty's Forces.

Key Findings

- The UK reported increases in employee jobs over the quarter (+0.8%) and over the year (+3.0%) to 31.49 million jobs in June 2022.
- All twelve UK regions showed an increase over the quarter. NI employee jobs increased by 0.4% over the quarter.
- All UK regions showed an increase over the year where the South West recorded the largest estimated annual increase (+6.2%). NI employee jobs increased by 3.6% over the year.

Figure 5.1: Annual and Quarterly Percentage Change in Employee Jobs by UK Region, June 2021 – June 2022 and March 2022 – June 2022

[Download Q2-22 Data](#)

6 Further Information

Background

Estimates of the number of employee jobs are obtained from the Quarterly Business Survey (QBS). The QBS is a statutory survey issued under the Statistics of Trade and Employment (Northern Ireland) Order 1988 and is designed to collect information on employees and turnover. The main outputs are published in four quarterly publications – the [Quarterly Employment Survey](#) (QES), [Index of Services](#) (IOS), [Index of Production](#) (IOP) and [Quarterly Construction Enquiry](#) (QCE).

Impact of COVID-19 on data collection and estimates

Due to restrictions in place for businesses, COVID-19 impacted on the data collection and validation of employee jobs data, which are collected on the Quarterly Business Survey. The following table provides an overview of median coverage response rates for 2019, 2021, and 2020, compared to Quarter 2 2022:

Response rate type	Q2 2022	2021 (median*)	2020 (median*)	2019 (median*)
Coverage response rate (returned employees)	66.5%	66%	64%	77%

*median value achieved at QES database closure of quarter 1, quarter 2, quarter 3 and quarter 4.

As a result, employee jobs estimates may be subject to higher revisions than normal over the coming quarters. These can be tracked through the revisions triangle on the [Quarterly Employment Survey Revisions page](#). Comparisons of provisional employee jobs estimates at lower industry levels in particular (e.g. 2 digit Standard Industrial Classification level), should be treated with caution.

It should be noted that from Quarter 2 2020 to Quarter 3 2021 the QES estimates included those who were furloughed under the [Coronavirus Job Retention Scheme \(CJRS\)](#).

An [analysis of the furlough data](#) collected on QES and a comparison to the official estimates produced by HMRC was published on 14 June 2022.

Sample

The QES, IOS, IOP and QCE are sampled independently and there is an overlap between QES and IOS/IOP/QCE of approximately 2,250 businesses. The QES covers all public sector bodies, all private sector firms with 25 or more employees, all businesses with more than one industry activity and a sample of the remainder. QES covers all industrial sections apart from agriculture. Employee estimates for the agricultural sector are provided, on an annual basis (figures for June are provided in the January of the following year), from the Department of Agriculture, Environment and Rural Affairs (DAERA) Farm Census. Agriculture employees include all workers on agricultural businesses other than (a) part-time farmers and partners and (b) farmers' spouses. They include full-time, part-time and casual workers, both paid and unpaid.

The QES sample is drawn from the Inter-Departmental Business Register (IDBR), as follows:

Employment Size/Sector	Percentage of businesses selected
0-9 employees	Sample (4%)
10-24 employees	Sample (9%)
Multiple Industry Activities	Full Count (100%)
25+ employees	Full Count (100%)
Public Sector	Full Count (100%)

As the QES is a sample survey, estimates obtained from it are subject to sampling variability i.e. if we drew many similar samples each would give a different result. [Confidence intervals PDF \(665KB\)](#) provide a measure of the size of the sampling variability. The 95% confidence interval for the June 2022

employee jobs estimate is 797,840 +/- 5,600. This means that in 100 similar samples we would expect 95 (95%) of the confidence intervals to contain the true population value of the number of employee jobs.

The survey collects information on numbers of persons in full-time and part-time employment. It should be noted that the survey counts the number of jobs rather than the number of persons with jobs. For example, a person holding both a full-time job and a part-time job, or someone with two part-time jobs, will be counted twice.

Employment results are collated into industry classes using the 2007 Standard Industrial Classification (SIC). As a result, no individual business can be identified.

Updates to the sample frame

The annual Business Register and Employment Survey (BRES) results are used to update employee and SIC code variables on the Inter Departmental Business Register annually in quarter 1. The impact of this update is greatest at 2 digit SIC level. Users should be aware that changes at this level may be due to a reallocation of jobs/businesses to SIC codes following the sample frame update.

Using 2 Digit SIC Level Data

The introduction of sample rotation from March 2014 contributed to the volatility of the series. To counteract these effects from March 2016 the number of businesses selected in SIC and size bands experiencing the greatest impact of rotation increased.

Volatility also arises when businesses inform NISRA of SIC code changes via business surveys, ONS and HM Revenue & Customs (HMRC). This new information helps to improve the industry estimates of employee jobs each quarter but also adds volatility to quarterly and annual changes, particularly at 2 digit SIC level. SICs 74 (Other professional, scientific and technical activities) and 82 (Office administrative, office support and other business support activities) are most affected by updates to industry codes. More information can be found in Section 3 of the [Analysis of the Impact of Quarterly Employment Survey Data Revisions PDF \(555KB\)](#) document. It is therefore recommended that changes in employee jobs estimates at 2 digit SIC level are considered in the context of a longer time series.

Revisions Policy

QES estimates are revised quarterly to reflect the latest information provided by employers. The March 2022 seasonally adjusted estimate published in June 2022 has been revised down (-0.1%). Estimates for the latest quarter as well as the previous four quarters are provisional and subject to revision in light of (a) late responses to surveys and administrative sources and (b) where cross survey congruence checks provide more accurate data. As a result of seasonal adjustment factors which are re-estimated every quarter, there may be amendments to the seasonally adjusted series outside of the revisable period (previous four quarters) and applicable back to March 2005. Only rarely are there avoidable 'errors' such as human or system failures, and such mistakes are made quite clear when they do occur. The revisions triangle can be accessed on the [Quarterly Employment Survey Revisions page](#).

Public Sector Reclassifications

Public sector jobs comprise Central Government (including Bodies under the aegis of Central Government), Local Government and Public Corporations. The following table summarises the changes announced by the Public Sector Classification Committee and the date the changes took place.

Date of change	Summary	Revision applied from
Dec 2006	NI Housing Executive reclassified from SIC 75 to SIC 70	Mar 2004
Jan 2012	Water service became a Government owned company, as a result employees transferred from "NI Central Government" to "Bodies under the Aegis of NI Central Government"	Apr 2007
Mar 2014	Lloyds Banking Group and its subsidiaries reclassified to private sector	Dec 2013
Sep 2017	Registered housing associations in NI reclassified to public sector	Sep 1992

Date of change	Summary	Revision applied from
Sep 2018	Registered housing associations in NI moved from section N to L in sections level data	Mar 2005
Aug 2020	Registered housing associations in NI reclassified to private sector*	Sep 2020

*See note on the [Quarterly Employment Survey Revisions](#) page for further information.

Seasonal Adjustment

A seasonally adjusted series provides a better indication of underlying trends in employment. Time series data for seasonally adjusted employee jobs from 2005 to date for industry section (A-S) and main industrial sector are available on the [Quarterly Employment Survey webpage](#).

The following series are seasonally adjusted:

- Male employee jobs in Mining and quarrying (Section B); Water supply, sewerage, waste management and remediation activities (Section E); Construction (Section F); Wholesale and Retail Trade, Repair of Motor Vehicles and Motorcycles (Section G); Transportation and Storage (Section H); Accommodation and Food Service Activities (Section I); Information and communication (Section J); Real estate activities (Section L); Professional, scientific and technical activities (Section M); Administrative and Support Service Activities (Section N); Public Administration and Defence, Compulsory Social Security (Section O); Education (Section P) Human Health and Social Work Activities (Section Q); Arts, Entertainment and Recreation (Section R) and Other service activities (Section S).
- Female employee jobs in Agriculture, Forestry and Fishing (Section A); Manufacturing (Section C); Electricity, gas, steam and air conditioning supply (Section D); Water supply, sewerage, waste management and remediation activities (Section E); Construction (Section F); Wholesale and Retail Trade, Repair of Motor Vehicles and Motorcycles (Section G); Transportation and Storage (Section H); Accommodation and Food Service Activities (Section I); Real estate activities (Section L); Professional, Scientific and Technical Activities (Section M); Administrative and Support Service Activities (Section N); Public Administration and Defence, Compulsory Social Security (Section O); Education (Section P); Human Health and Social Work Activities (Section Q); Arts, Entertainment and Recreation (Section R) and Other service activities (Section S).

Seasonal adjustment models are periodically reviewed as seasonal trends can change over time. The latest review was carried out in April 2022 and more information can be found in the QES Seasonal Adjustment Review Report on the [Quarterly Employment Survey Revisions page](#). The next seasonal adjustment review is scheduled to take place in 2023.

Alternative measures of employment

QES is only one of the measures of employment for NI. Other measures are summarised below.

[Business Register and Employment Survey \(BRES\)](#) - a statutory business survey based on a larger sample than QES. Quarter 3 of the QES is taken at the same survey date as BRES. Information on employee jobs at a sub NI level (e.g. District Council Area) and at the 5-digit SIC07 level are available from BRES. The QES sample size is designed so that estimates of total employee jobs are within +/- 1% of the BRES total.

[Labour Force Survey \(LFS\)](#) - a household survey carried out by interviewing individuals about their personal circumstances and work. The LFS defines employment as the number of people in work. This differs from the concept of jobs measured by business surveys as a person can have more than one job, and some jobs may be shared by more than one person. LFS employment figures are based on a rolling three month period whereas QES measures the number of jobs on a particular day. LFS employment

figures include those who are employed, self-employed, unpaid family workers and those on government supported training programmes.

[Agricultural Census](#) - the numbers of employees in agriculture are available separately from the Department of Agriculture, Environment and Rural Affairs (DAERA) Agricultural Census. The Census is conducted in June of each year, with the results published in the January of the following year. The QES includes farm census figures in the total number of employee jobs.

[Northern Ireland Civil Service \(NICS\) Employee Bulletin](#) – provides further information on NICS employee jobs. The survey dates for the NICS Employee Bulletin differ from the QES survey dates. As such the figures for the NICS employee jobs may differ. NICS employee jobs figures are included in the QES employee jobs figures and breakdowns can be found in Table 5.12 on the [Economic and Labour Market Statistics website](#) (in the historical data section).

Annualised or Rolling 4 Quarters

Annualised change or rolling 4 quarters figures are calculated by taking the difference between the average over the most recent 4 quarters and the average over the same 4 quarters of the previous year, as a proportion of the average over the same 4 quarters of the previous year. For example annualised growth of +2.4% in June 2022 reported in this publication is the average number of jobs from Q3 2021 to Q2 2022 minus the average number of jobs from Q3 2020 to Q2 2021, divided by the average number of jobs from Q3 2020 to Q2 2021. This measure allows for comparison in growth to previous years and is useful in determining trends in the data.

Date of next publication

Forthcoming release dates are published in the [Economic & Labour Market Statistics Branch Publication Schedule](#). The next Northern Ireland Quarterly Employment Survey publication is planned for 13th December 2022.

Labour Market Statistics user engagement

The Labour Market Statistics user group meeting 2022 will take place online on Thursday 29th September 2022 at 10am. To register for this event, please follow this link: [Labour Market Statistics user group meeting 2022 invitation](#).
