Northern Health and Social Care Trust

www.northerntrust.hscni.net

Contents

The Health and Social Care Board each year set out a Commissioning Plan setting out priorities and targets that have been included in the Department of Health (DoH) Commissioning Plan Direction (CPD). These priorities and targets have associated measures or performance indicators. This report monitors achievement against these targets and indicators for the Northern Health and Social Care Trust.

CPD targets and indicators for 2019/20 have not yet been confirmed. 2018/19 targets are being used to monitor performance in the interim.

- 1.0 Service User Experience (page 6)
- 2.0 Safe and Effective Care (page 9)
- 3.0 Quality Standards & Performance Targets (page 25)
- 4.0 Use of Resources (page 62)
- 5.0 Workforce (page 67)
- 6.0 Appendix (page 70)
- 6.1 Glossary (page 71)

Key

RAG Rating (Red/Amber/Green)*					
Red (R) Not Achieving Target					
Amber (A)	Almost Achieved Target				
Green (G)	Achieving Target				
Grey (GR)	Not Applicable / Available				

Trend on Previous Month (TOPM)						
1	Performance Improved					
<u> </u>	Performance Deteriorated					
\longleftrightarrow	Performance Static					

^{*}For targets which are zero, eg: No patient to wait longer than 52 weeks for an outpatient appointment, an absolute approach will be adopted for RAG rating. One breach of the target will therefore result in the target being rated red. For all other targets a variance of 5% or greater from the target will result in the rating being red.

Summary of Trust Performance against 20	18/1		
Rating based on most recent month's available performance		(2019/20 targets not yet confirmed)	
By March 2019, secure a reduction in the number of MRSA infections. MRSA 2018/19 Trust target is no more than 7 cases. (CPD 2.4)	G	By March 2019, 95% of patients attending any type 1, 2 or 3 emergency department are either treated and discharged home, or admitted, within four hours of their arrival in the department (CPD 4.4)	R
By March 2019, secure a reduction in the number of CDIFF infections. CDIFF 2018/19 Trust Target is no more than 49 cases. (CPD 2.4)	G	By March 2019, no patient attending any emergency department should wait longer than 12 hours (CPD 4.4)	R
By 31st March 2020 secure an aggregate reduction of GNB bloodstream infections acquired after two days of hospital admission. (CPD 2.3)	R	By March 2019, at least 80% of patients to have commenced treatment, following triage, within 2 hours (CPD 4.5)	R
By March 2019, ensure that at least 15% of patients with confirmed Ischaemic stroke receive thrombolysis treatment, where clinically appropriate. (CPD 4.7)	G	By March 2019, ensure that 90% of complex discharges from an acute hospital take place within 48 hours (CPD 7.5)	R
By March 2019, all Urgent diagnostic tests are reported on within 2 days. (CPD 4.8)	R	By March 2019, no complex discharge takes more than seven days (CPD 7.5)	R
During 2018/19, all urgent suspected breast cancer referrals should be seen within 14 days. (CPD 4.9)	R	By March 2019 all non-complex discharges from an acute hospital take place within six hours. (CPD 7.5)	R
During 2018/19, at least 98% of patients diagnosed with cancer should receive their first definitive treatment within 31 days of a decision to treat. (CPD 4.9)	R	By March 2019, no patient waits longer than nine weeks to access adult mental health services (CPD 4.13)	R
During 2018/19, at least 95% of patients urgently referred with a suspected cancer should begin their first definitive treatment within 62 days ($\underline{CPD}\ 4.9$)	R	By March 2019, no patient waits longer than 9 weeks to Access dementia services. (CPD 4.13)	G
By March 2019, 50% of patients should be waiting no longer than 9 weeks for an outpatient appointment. (CPD 4.10)	R	By March 2019, no patient waits longer than 13 weeks to access psychological therapies (any age) (CPD 4.13)	R
By March 2019, no patient to wait longer than 52 weeks for an outpatient appointment. (CPD 4.10)	R	During 2018/19, ensure that 99% of all learning disability discharges take place within seven days of the patient being assessed as medically fit for discharge (CPD 5.7)	G
By March 2019, 75% of patients should wait no longer than 9 weeks for a diagnostic test (CPD 4.11)	R	During 2018/19, no learning disability discharge to take place more than 28 days of the patient being assessed as medically fit for discharge (CPD 5.7)	G
By March 2019, no patients should wait no longer than 26 weeks for a diagnostic test (CPD 4.11)	R	During 2018/19, ensure that 99% of all mental health discharges take place within seven days of the patient being assessed as medically fit for discharge (CPD 5.7)	G
By March 2019, 75% of patients should wait no longer than 9 weeks for an Endoscopy diagnostic test. (CPD 4.11)	R	During 2018/19, no mental health discharge to take place more than 28 days of the patient being assessed as medically fit for discharge. (CPD 5.7)	G
By March 2019, no patient should wait longer than 26 weeks for an Endoscopy diagnostic test. (CPD 4.11)	R	By March 2019, the proportion of children in care for 12 months or longer with no placement change is at least 85%.(CPD 1.10)	A
By March 2019, 55% of patients should wait no longer than 13 weeks for inpatient/ daycase treatment. (CPD 4.12)	R	By March 2019, 90% of children, who are adopted from care, are adopted within a three year time frame (from date of last admission). (CPD 1.10)	R
By March 2019, no patient waits longer than 52 weeks for inpatient/ daycase treatment (CPD 4.12)	R	By March 2019, no patient waits longer than 9 weeks to access child and adolescent mental health services. (CPD 4.13)	R
By March 2019, no patient should wait longer than 13 weeks from referral to commencement of treatment by an allied health professional. (CPD 5.3)	R	By March 2019, secure a 10% increase in the number of direct payments to all service users. (CPD 5.1)	G
By March 2019, to establish a baseline of the number of hospital cancelled, consultant led, outpatient appointments in the acute programme of care which resulted in the patient waiting longer for their appointment and by March 2020 seek a reduction of 5%. (CPD 7.3)	A	By March 2019, secure a 10% increase in the number of carers' assessments offered to carers for all service users. (based on 2017/18 figures) (CPD 6.1)	G
By March 2019, all Trusts must demonstrate 70% compliance with the regional Medicines Optimisation Model against the baseline established at March 2016. (CPD 2.6)	G	By March 2019, secure a 5% increase in the number of community based short break hours (i.e. non-residential respite) received by adults across all programmes of care. (based on 2017/18 figures) (CPD 6.2)	A

Key Trust Challenges and Progress

(including performance trend on previous month – TOPM, improved - ↑, deteriorated - ↓)

Emergency Dept. seen/treated/discharged within 4 hrs and 12 hrs

Performance against the 4 hour target during July 2019 was 62% at Antrim and 72% at Causeway hospitals. Antrim ED had 274 twelve hour breaches. compared to 266 the previous month whilst Causeway Hospital had 183 twelve hour breaches compared to 189 the previous month. Cumulatively the Trust has experienced 2262 twelve hour breaches from April – July 19 compared to 1237 for the same period last year.

457

12 hour breaches July 2019 (PAGE 38)

TOPM ↓

Red flag cancer referrals have increased by 15% for April - July 19 compared to the same period last year. With regard to SBA volumes at the end of July the combined position for elective inpatients and day cases was 14% below expected SBA volumes. New outpatient attendances were 3% below SBA volumes whilst review attendances were 11% above volumes.

Demand and Elective Waiting Lists

The number of outpatients waiting longer than 52 weeks for an appointment has increased this month with 14611 patients breaching the 52 week target at the end of July. There continues to be a significant demand/capacity gap in a range of outpatient specialties and the position is likely to deteriorate further.

With regard to AHP services, there were 3988, 13 week breaches at the end of July compared to 4016 the previous month with Podiatry and Orthoptics having no breaches. Capacity and demand issues continue to impact AHP services with actions being taken where possible. (PAGE 33)

15%

Increase in Red Flag Cancer referrals Apr - July 19 compared to Apr – July 18 (PAGE 64)

TOPM ↓

Psychological Waits

At the end of July there were 145 patients waiting over 13 weeks, compared to 126 the previous month. Performance is being impacted in the main by LD and Clinical Health Psychology services. Clinical Health Psychology had 85 breaches and remain on track to improve this position considerably by quarter 3 as a successful pilot Service delivery model has now been rolled out (August 2019).

The Learning Disability (adult and children) service had 56 breaches. There has been some reduction in capacity in relation to qualified staff and absence earlier in the year has impacted on waiting times. Actions being taken include on-going engagement with referring agents re other models of provision and ongoing use of agency during periods of reduced capacity within the service.

Children waiting > 13 weeks to access Autism Spectrum **Disorder Diagnostic Service**

At the end of July 2019 there were 243 patients waiting >13 weeks. Since October 18, totals waiting, totals breaching and longest waiting times for assessment to commence began to decrease, however this improvement has not been sustainable due to the significant increase in referrals over the last 6 months. Performance has been impacted by staff absence and vacant posts.

A review of demand and capacity using the new and established care pathways has identified that each new referral for diagnostic assessment will require on average 4 contacts (3.89) to complete assessment. The intervention service is understaffed equivalently and will require a similar additional resourcing. Further detailed demand and capacity work to be undertaken to model this service. In order to fulfil the growing demand for outward facing work, training & capacity building in other services, a further understanding would be required to measure the additionally required – it is anticipated this could be as much as 2 WTE in staff.

Following changes in referral rate and staffing levels, further analysis of the impact of recovery actions has been undertaken. The forecast of continuing improvement should be considered with caution based on the increasing trend to referral rate over the last 6 months. Should non recurrent funding cease it may significantly impact on this forecast.

145

Psychological waits over 13 weeks at the end of July 2019.

(PAGE 45) TOPM ↓

243

Children waiting for assessment over 13 weeks at the end of July 2019.

(PAGE 59)

TOPM ↓

14 Day Urgent Suspected Breast Cancer referrals to consultation

The breast service is under considerable pressure and is only able to keep on top of demand through significant use of WLI funding. Increases in demand and unanticipated consultant absence, has led to a deterioration in performance over recent months. Moving into the next quarter the service continues to be under considerable pressure and it is anticipated demand will continue to exceed our capacity.

24%

Achieved in July 2019 (PAGE 26) TOPM ↑

Diagnostic Waiting Times

This is not a performance issue. SBA volumes are being met but diagnostic demand exceeds capacity across all modalities. The rise in unscheduled care activity continues to compromise elective waiting times and imaging equipment is running at full commissioned capacity. Additional activity is being undertaken with non-recurrent elective access funding, but it will take several months to fully address the backlog. Confirmation of recurrent funding for CT, NOUS and plain film x-ray has now been received and plans are in place to commence recruitment of additional staff. Waiting times will reduce, however recruitment and the need for additional scanners will continue to limit overall improvement.

12610 Patients waiting over 26 weeks at the end of July 2019 for a Diagnostic test (PAGE 30) TOPM ↓

62 Day Urgent Suspected Cancer referrals to commence treatment

At least 95% of patients urgently referred with a suspected cancer should begin their first definitive treatment within 62 days.

58% Achieved in July 2019

(PAGE 28) ТОРМ ↑

Complex Discharges

Complex discharges for July 2019 was 80% of patients discharged within 48 hours compared to the target of 90%. During July there were 112 delays with 26 being greater than 7 days across the 2 hospital sites. The number of delays is reflective of the complexities and needs of an aging patient group. 23 of the 26 delays were from Antrim hospital, with 3 of the 26 from Causeway.

26

Complex discharges > 7 days July 2019 (PAGE 42)

TOPM ↓

1.0 Service User Experience

1.1 Patient Experience as related in Patient Surveys

The 10,000 More Voices initiative continues using a phased approach including regional and specialist projects. **14,743 patient** stories have been returned regionally (correct at 31/07/2019), of which **3,408** (23.1%) are NHSCT stories. Stories continue to illustrate compliance with the patient and client experience standards.

Regional projects - Live

Story collection, feedback and work on areas of improvement continues to be supported in the following areas

- Experience of Delirium Data collection stage
- Experience of Adult Safeguarding Remains open even though Regional Report completed
- Experience in Health and Social Care (Generic Tool) Data collection stage
- Staff Experience Data collection stage
- Northern Ireland Ambulance Service Data collection stage
- Experience of Mental Health Services Data collection stage
- Staff Experience Mental Health Services Data collection stage
- Experience of Paediatric Audiology Data collection stage
- Experience of Living in a Care Home Data collection stage

Regional Projects now closed

Stories / Feedback shared, reports being drafted for approval and / or awaiting return of action plans in the following work streams:

- Experience of Eye care Services in Northern Ireland.
- Experience of Discharge.
- · Experience of Bereavement.

Regional Projects in Planning Phase

- Experience of Care of patient with Neurological condition (now on hold).
- Experience of Sensory Disability (now on hold).
- Experience of Dysphagia.
- Experience of Custody Suite, Musgrave Street

At local level the NHSCT are using the 10,000 More Voices Health and Social Care (generic) Survey Tool to capture the experience of service users within the following areas:

Local projects - Live

- Experience of Oral Hygiene C3 on hold.
- Experience of admission through ED to B1 prior to implementation of the Acute Medical Model

Local Projects Closed

Stories / Feedback shared, reports being drafted for approval and / or awaiting return of action plans in the following work streams:

- Experience of Lap Chole in AAH.
- C3 HCA improvement project.
- PACE Project MED 1, MED 2 and C7 closed 31/07/2019.

Table 1 Live projects – Numbers of stories collected both regionally and in NHSCT (validated 31/07/2019)

	Regional Returns	NHSCT Returns	Rated as strongly positive or positive	Rated as neutral or not sure	Rated as negative or strongly negative	
Northern Ireland Ambulance Service ¹	333	159 (48%)	149	7	3	Projects ongoing
Adult Safeguarding	196	30 (15.3%)	23	6	1	
Staff experience	507	51 (10%)	17	24	10	
Health and Social Care in Northern Ireland (These figures include stories relating to local projects)	2506	849 (34%)	754	68	27	
Experience of Delirium	82	19 (23%)	12	4	3	
Experience of Mental Health Services	596	142 (23.8%)	89	26	27	
Staff Experience Mental Health Services	187	25 (13.3%)	There is no rate of experience recorded on this survey			
Experience Paediatric Audiology	111	31 (27.9%)	30	1	0	

1.0 Service User Experience

1.2 Complaints / Compliments

Main Issues Raised Through Complaints

The Trust actively encourages feedback from our service users including complaints, compliments or enquiries. Such feedback helps identify areas where high quality care is being provided and where this is not the case, use these as an opportunity for learning and improving services.

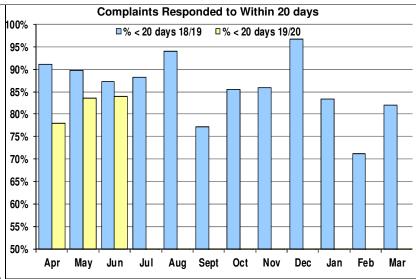

We aim to respond to complaints within 20 working days, where possible, and strive to ensure that there is a full, fair and objective investigation of the issues and concerns raised and that an effective response/outcome is provided. We will continue to do our utmost to resolve complaints; however this may not be possible in all cases.

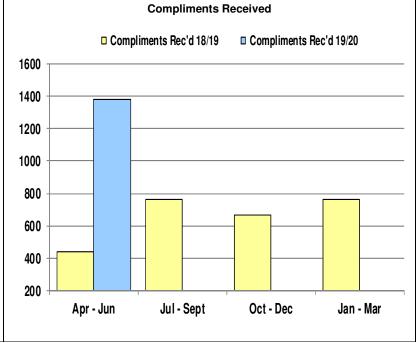

During June 2019 there were 56 formal complaints, 1 of which was reopened. Of these complaints 47 (84%) were responded to within 20 working days. The main issues raised are in relation to quality of treatment and care, staff attitude/behaviour and communication/information.

Compliments and suggestions/comments made by service users are acknowledged and shared with relevant staff/teams.

Complaints information is presented one month in arrears.

June 2019 Position	MEM	scs	WCF	MHLDC	Community	CSS & Nursing	SDBS	M&G	Finance	H	Unknown	Trust Total
Number Of Complaints	15	10	9	10	5	6	ı	1	ı	ı	ı	56

Compliments Received Qtr 1 (2019/20)	197	131	193	115	693	48					3	1380

- 2.1 Healthcare Acquired Infections (page 10)
- 2.2 Stroke (page 12)
- 2.3 Omitted Medicines / NEWS (B2) / VTE (B7) / Falls (B4) / Pressure Ulcers (B3) / Anti-Absconding Care / MUST (page 13)
- 2.4 Serious Adverse Incidents (page 24)

2.1 Healthcare Acquired Infections (CPD 2.3 & 2.4)

Causes/Issues that are impacting on performance

MRSA –The PHA target for MRSA bacteraemia has not yet been set for 2019/2020. At the end of July 2019, 3 MRSA bacteraemias have been identified. All 3 cases were identified within 48 hours of admission to hospital. All MRSA bacteraemias are ascribed to the Trust regardless of where they are identified. Going forward a Post Infection Review will continue at ward level for every case of MRSA bacteraemia identified and any case of MSSA bacteraemia where issues have arisen. Work is continuing at ward level to raise awareness of MRSA management and placement of at risk patients.

CDIFF – The Trust target for CDI (Clostridium difficile infection) in 2019/20 has not yet been set by PHA. At the end of July 2019 the Trust has identified a total of 10 cases of CDI. A total of 6 cases have been identified within 48 hours of admission to hospital and 4 cases have been identified 48 hours after admission. The Post Infection Review process continues at ward level for each case of CDI identified. CDI cases continue to present challenges in relation to early identification and isolation, additionally, current bed pressures and increased patient acuity continue to present difficulties by potentially increasing the risk of transmission.

Actions being taken with time frame

MRSA - Blood Culture Competency based training and Aseptic Non-Touch Technique (ANTT) training on-going across the Trust. Infection prevention and control training DVD shared with private nursing homes and Nursing Home In reach Project by Corporate Nursing Team includes an Infection Control element. IPCN's and the 'In reach Project team' will continue to work alongside PHA colleagues in relation to planning future education for private nursing homes. Education and increased audits of practice will continue for central and peripheral line care in all inpatient areas.

Enhanced monitoring of compliance with the Trust MRSA Policy and MRSA Care Bundle continues Trust wide. Post Infection Review will continue to be undertaken for every new case of MRSA bacteraemia. Focused commitment by the IPC Nursing Team to visit daily Emergency Departments and high risk acute inpatient areas in Antrim and Causeway to increase awareness of MRSA identification, placement and management with all staff. Additional refresher and induction IPC training delivered in both Antrim and Causeway sites.

CDIFF – Post Infection Review process continues at ward level for each new case identified. Microbiology-led antimicrobial stewardship rounds continue to support appropriate antibiotic prescribing. These stewardship rounds are being undertaken weekly in Causeway and also undertaken in high use areas where clinical attendance allows. The protocol for Medical assessment of patients presenting with vomiting and/or diarrhoea is enforced by the IPC team who continue to increase awareness of correct placement and management of patients presenting with diarrhoea with all staff. Additional IPC training is delivered as necessary.

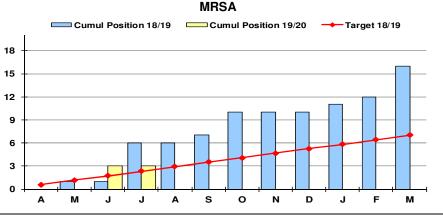

Environmental cleanliness audits and clinical practice audits remain on-going. Intensive cleaning programme is on-going across all inpatient areas. Focused commitment by IPC Nursing Team to visit daily Emergency Departments and high risk acute inpatient areas in Antrim and Causeway

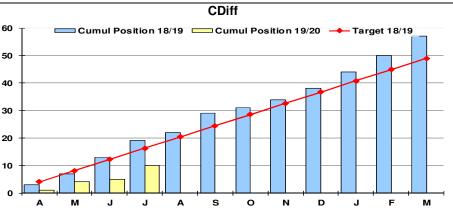

Forecast impact on performance

Both HCAI targets for the NHSCT have not been set for 2019/20.

	Actual Activity 18/19	May 19	Jun 19	Jul 19	Cumulative position as at 31/07/19
No of MRSA cases	16	0	3	0	3
No of CDiff cases	57	3	1	5	10
Deaths associated with CDiff	4	0	0	0	0

Target – 2018/19 MRSA = 7, CDiff = 49 (2019/20 target not yet confirmed) While these are the cases reported/detected in a hospital setting, several cases will have come from a community setting.

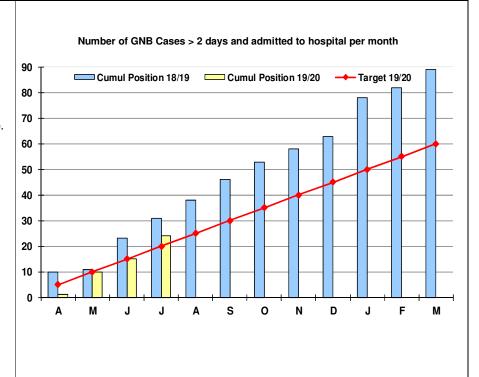

2.1 Healthcare Acquired Infections (CPD 2.3 & 2.4)

Healthcare-associated Gram-negative bloodstream infections

CPD 2.3 - By 31st March 2020 secure an aggregate reduction of Escherichia coli, Klebsiella spp. and Pseudomonas aeruginosa bloodstream infections acquired after two days of hospital admission.

The NHSCT target for 2019/20 is 60 cases > 2 days.

19/20 target of 60 is provisional pending review of the case definition. It is expected the target will change in-year.

Number of cases > 2 days admitted to hospital per month	Aug 18	Sept 18	Oct 18	Nov 18	Dec 18	Jan 19	Feb 19	Mar 19	April 19	May 19	Jun 19	Jul 19	Cumulative position as at 31/07/19
E.Coli	3	6	5	4	5	12	3	6	1	9	3	8	21
Klebsiella spp (Oxytoca and Pneumoniae)	4	1	1	1		2	1				2	1	3
Pseudomonas Aeruginosa		1	1			1		1				0	0
GNB Total	7	8	7	5	5	15	4	7	1	9	5	9	24

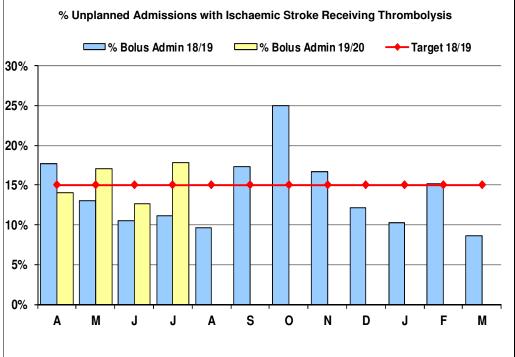

Cumulative 18/19 = 89 cases against a target of 75 Annual target for 18/19 was 75 cases

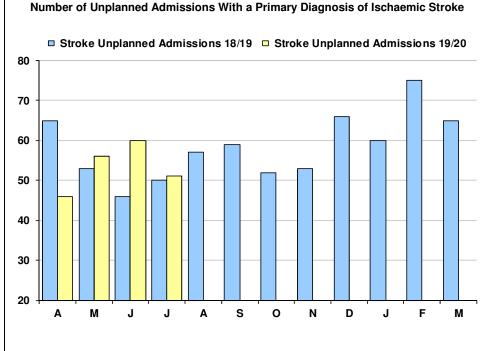

2.0 Safe and Effective Care 2.2 Stroke (CPD 4.7)

Causes/Issues that are impacting on performance

While Antrim reached 22% for lysis, Causeway performance was 8%, therefore both sites combined performance was 18% overall for July, which was 3% above the 15% lysis target. There were no issues identified.

	Target 18/19	May 19	Jun 19	Jul 19
% Ischaemic stroke receiving thrombolysis (CPD 4.7)	15%	17%	13%	18%
Number of unplanned admissions with a primary diagnosis of Ischaemic stroke		56	60	51

2.3 Omitted Medicines / NEWS (B2) / VTE (B7) / Falls (B4) / Pressure Ulcers (B3) / Anti-Absconding Care / MUST

We will	reduce harm from medication	errors	
Eileen McEneaney	Aim OMITTED / DELAYED MEDICINES (KPI) To monitor the incidence of prescribed medication that has been omitted or delayed with no reason recorded.	Participate and contribute to regional discussions on data collection and reporting Validation of ward audit of medicine charts Agree reporting and data collection processes within Trust in accordance with regional decisions; working group Continue to raise awareness of impact of omitted and delayed medicines on patient safety	Trust - Rate of omitted / delayed medications 4.50% 4.00% 3.50% 2.50% 1.50% 1.00% 0.50% 0.00% And the property of the propert
	Description A minimum of 10 charts per month in acute adult in-patient wards. Data is captured for all wards using the Alamac system.	Areas for improvement Agree, develop and contribute to regional discussions on data collection and reporting Develop further validation process of ward audits of medicine charts Agree reporting and data collection processes within Trust in accordance with regional decisions; establish working group Continue to raise awareness of impact of omitted and delayed medicines on patient safety	Trust - Rate of omissions / delays related to critical medicines 0.50% 0.40% 0.30% 0.00% 0.10% 0.00% 1.10

We will	reduce harm for the deteriorat	ing patient	
Exec. Lead	Aim	Current position	
Eileen McEneaney	NATIONAL EARLY WARNING SCORES (NEWS) (KPI) 1) The aim of the implementation of NEWS is early identification of the deteriorating patient, ensuring appropriate escalation and prompt action 2) To achieve 95% compliance with accurately completed NEWS 3) To undertake Peer Auditing of NEWS compliance 4) Regional HSC Safety Forum annual audit of NEWS	 NEWS audits continue to be carried out in each ward, 10 charts per month Validation audit carried out Deterioration patient training has been updated on Mandatory Nurse training programme Life support courses continue to teach all clinical staff on NEWS 	Trust - % compliance with completion of NEWS 105% 100% 95% 90% 85% 100%
	Description NEWS monthly audits are carried out by all wards on the following elements: Part 1 1. All vital signs recorded 2. Risk score totalled 3. NEWS score correct 4. 		Tests Urgent By March 2019, all urgent diagnostic tests should be reported on within two days (CPD 4.8) CAUSES / ISSUES IMPACTING ON PERFORMANCE There is a significant Reporting Capacity-demand gap. ACTIONS BEING TAKEN WITH TIME FRAME Two WTE consultant radiologists have recently taken up post. Additional reporting radiographers will be appointed as part of the new IPT investment (recruitment process is ongoing) however staff will take up to 18 months to reach full competency. FORECAST IMPACT ON PERFORMANCE Even with the new investment the Trust will continue to require independent sector support due to shortage in radiologists. Therefore it is anticipated that performance will remain below 100%. Diagnostic Tests reported < 2 days Aug Sept Oct Nov Dec Jan Feb Mar Apr May Jun Jul TOP											100% 95% 90% 85% 80% 75%	A M	% < 2 da	agnost ys 18/19	ic Test	s repo □% < 2	rted <	Targ	et 18/19	• M		

SCS/MEM/WCF

Cancer Care 14 day During 2018/19, all urgent suspected breast cancer referrals should be seen within 14 days (CPD 4.9)

CAUSES / ISSUES IMPACTING ON PERFORMANCE

The breast service is under considerable pressure and is only able to keep on top of demand through significant use of WLI funding. Funded red flag outpatient SBA is 2,880 (240 per month), but in 2018/19 a total of 3,998 patients were seen (333 per month or 39% above core capacity). 465 red flag referrals were received during the month of May 2019, almost double the service's core capacity for that month.

ACTIONS BEING TAKEN WITH TIME FRAME

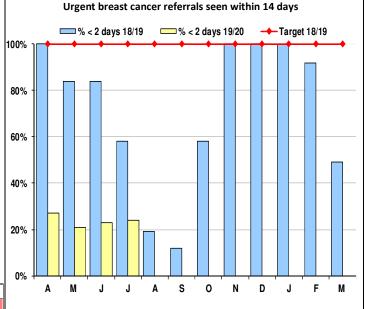

Increases in demand and unanticipated consultant absence has led to a deterioration in performance over recent months. The longest wait in June was 27 days. July performance against the 14-day target was 24.2% and the longest wait was 27 days

A fourth weekly breast clinic will commence in September 2019, increasing the service's core capacity. The Trust has submitted an IPT for a fourth breast consultant; once this position is appointed this will place the specialty in a more sustainable position.

FORECAST IMPACT ON PERFORMANCE

Moving into the next quarter the service continues to be under considerable pressure and it is anticipated demand will continue to exceed our capacity. The service has requested support from other Trusts but unfortunately they are not able to provide access to date. We continue to liaise with other Trusts on an ongoing basis to see if the service can secure some additional activity. In addition, we continue to scrutinise our capacity with fortnightly capacity/ demand analysis meetings and the breast consultants continue to provide additional capacity through the use of ongoing WLI funding.

Cancer Care SCS/MEM/WCF 31 day

During 2018/19. at least 98% of patients diagnosed with cancer

should receive their first definitive treatment within 31 days of a decision to treat (CPD 4.9)

CAUSES / ISSUES IMPACTING ON PERFORMANCE

Ongoing issues in breast cancer, where a high level of demand for red flag outpatients has resulted in increased pressure on the surgical service as patients convert to requiring procedures. As the team is already stretched maintaining the 14-day target, there is not enough surgical capacity to consistently meet the 31-day timeframe. All core theatre lists have been delivered and backfilled where possible; however, the pension tax issue is reducing the services availability to deliver further additional theatre lists.

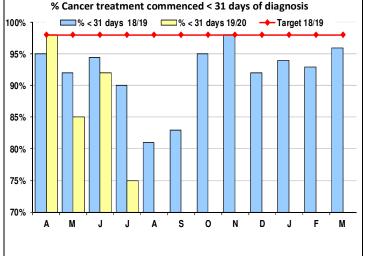

ACTIONS BEING TAKEN WITH TIME FRAME

Additional theatre lists are being arranged where possible. A review of the breast service is underway at a regional level, to agree how best to ensure a sustainable service for the future.

FORECAST IMPACT ON PERFORMANCE

It is likely there will continue to be 31-day breaches in breast surgery until permanent additional capacity can be

% Canc	% Cancer treatment commenced < 31 days of diagnosis

Cancer Care 62 day During 2018/19, at least 95% of patients urgently referred with a suspected cancer should begin their first definitive treatment within 62 days. (CPD 4.9)

CAUSES / ISSUES IMPACTING ON PERFORMANCE

Lower/upper GI: Delays in accessing surgical OP remain – increased demand and lack of OP and theatre capacity. **Lung:** Complex cases requiring a number of diagnostic tests, delays in PET scans and thoracic surgery in BT. Delays continue for PET, BT sending suitable patients to Dublin for procedure.

Breast: Delays are likely to continue in undertaking breast surgery depending on the numbers washing through secondary to higher demand

Skin: Long term unplanned leave of a consultant from June will cause further deterioration.

Gynae: Continuing delays in accessing hysteroscopy within 14 days due to unplanned leave of medical staff member, with additional lists being arranged to meet demand

ACTIONS BEING TAKEN WITH TIME FRAME

Lower/upper GI: Additional endoscopy sessions for Red Flag patients. Some patients being referred to IS to release RF capacity

Breast: Additional outpatient clinics and inpatient theatre lists being arranged with elective access funding. **Lung:** Proactive monitoring in place

Gynae: Additional hysteroscopy sessions being undertaken.

Skin: Additional in house outpatient and surgical lists have been undertaken following transfer of patients to the Independent Sector. Belfast working with PHA to address capacity issues for plastic surgery.

FORECAST IMPACT ON PERFORMANCE

Urgent cancer referrals treatment < 62 days (%)

Lower GI: Performance will remain below the target level due to delays accessing first outpatient appointment and endoscopy.

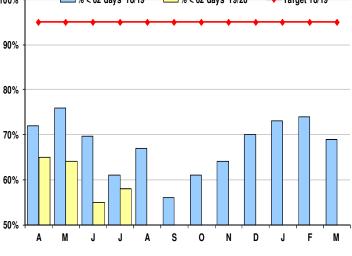

Skin: Considering the use of Independent Sector providers to mitigate the impact of dermatology consultant absence.

- (O) Other 0 patients treated

Outpatient Waits By March 2019, 50% of patients should be waiting no longer than 9 weeks for an outpatient appointment

(CPD 4.10)

CAUSES / ISSUES IMPACTING ON PERFORMANCE

This is not a performance issue. Demand is significantly higher than capacity in a great number of specialties. The most notable change / deterioration in this performance is due to there being limited capacity to undertake additional in-house activity and no funding available to transfer new outpatients to the Independent Sector.

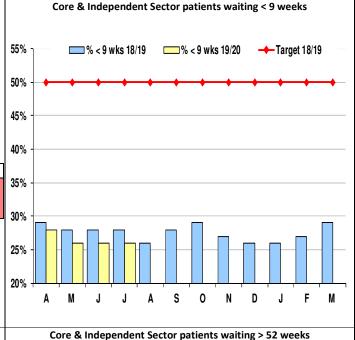

ACTIONS BEING TAKEN WITH TIME FRAME

Continue to maximise all available outpatient capacity and maintain low DNA rates for new and review patients.

FORECAST IMPACT ON PERFORMANCE

There is a significant demand/capacity gap in a range of outpatient specialties. The position is likely to deteriorate further

SCS

Diagnostic waits

By March 2019, 75% of patients should wait no longer than 9 weeks for a diagnostic test and no patient waits longer than 26 weeks. (CPD 4.11)

CAUSES / ISSUES IMPACTING ON PERFORMANCE

Imaging: This is not a performance issue. SBA volumes are being met but diagnostic demand exceeds capacity across all modalities. The rise in unscheduled care activity continues to compromise elective waiting times and imaging equipment is running at full commissioned capacity.

ACTIONS BEING TAKEN WITH TIME FRAME

Imaging: Additional activity is being undertaken with non-recurrent elective access funding, but it will take several months to fully address the backlog. Confirmation of recurrent funding for CT, NOUS and plain film x-ray has now been received and plans are in place to commence recruitment of additional staff (recruitment process ongoing) however capacity will still be restricted in some modalities due to the number of scanners in operation. 2nd MRI scanner operational on Antrim site from November.

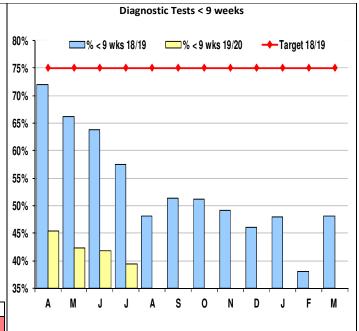

Clinical Physiology: The Trust has moved to a Clinical Physiology led model for the pharmacological component of myocardial imaging allowing additional capacity. To date this has been funded with non-recurrent monies and may not be sustainable in the long term.

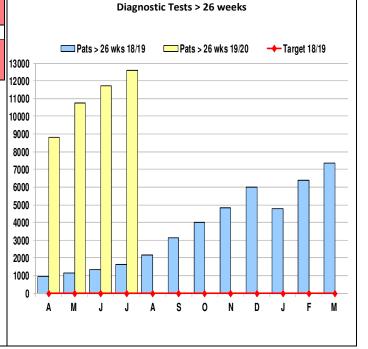

FORECAST IMPACT ON PERFORMANCE

Imaging: Waiting times will reduce however recruitment and the need for additional scanners will continue to limit overall improvement.

Clinical Physiology: The service is working at full capacity and there is unlikely to be significant improvement until investment can be secured.

SCS

Diagnostic waits Endoscopy

By March 2019, 75% of patients should wait no longer than 9 weeks for a diagnostic test and no patient should wait longer than 26 weeks (CPD 4.11)

CAUSES / ISSUES IMPACTING ON PERFORMANCE

While recurrent investment was received into gastroenterology which has increased endoscopy capacity, it has not yet been possible to provide all associated endoscopy lists.

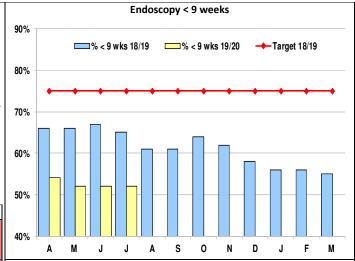

ACTIONS BEING TAKEN WITH TIME FRAME

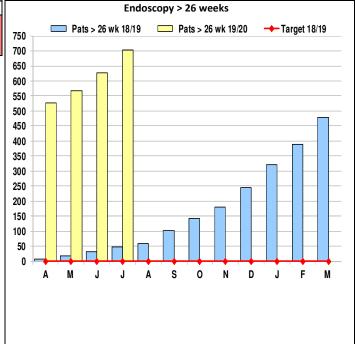

Elective access funding for additional in-house capacity has been secured going into 2019/20, which will be focused on maintaining red flag waiting times. No funding has been allocated to transfer routine patients to the Independent Sector and there is no regional framework in place to procure IS contracts. Project underway to create additional capacity through extended working in endoscopy. Additional nurse endoscopy staff in training.

FORECAST IMPACT ON PERFORMANCE

Routine waiting times are likely to increase until additional capacity can be secured through increasing core volumes and/or transferring patients to the Independent Sector.

Inpatient / Daycase Waits

By March 2019 55% of patients should wait no longer than 13 weeks for inpatient/ daycase treatment and no patient waits longer than 52 weeks. (CPD 4.12)

CAUSES / ISSUES IMPACTING ON PERFORMANCE

Theatre capacity: High demand for red flag and urgent patients and a lack of theatre capacity on the Antrim site reduces the Trust's ability to treat routine inpatients, increasing overall waiting times.

Unscheduled pressures: There has been a planned reduction in the number of routine patients scheduled over the winter months due to significant pressure on the unscheduled care system.

Demand/capacity gap: There is a gap between capacity and demand in a range of surgical specialties requiring capacity to be focused on confirmed cancer and urgent cases.

ACTIONS BEING TAKEN WITH TIME FRAME

Unscheduled pressures: the Trust has continued to reduce its elective admissions to allow for unscheduled pressures. This policy is being kept under close review.

FORECAST IMPACT ON PERFORMANCE

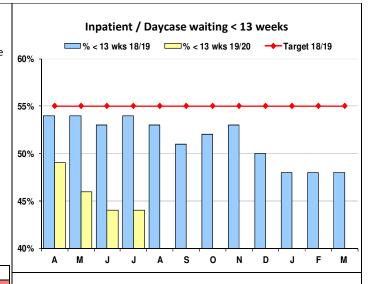

The capacity/demand gap and ongoing reduction in elective admissions is likely to result in an overall increase in waiting times.

Excludes scopes which are solely within 9 weeks position.

AHP Waits

By March 2019, no patient should wait longer than 13 weeks from referral to commencement of treatment by an allied health professional (CPD 5.3)

CAUSES / ISSUES IMPACTING ON PERFORMANCE

Physiotherapy (1311) Orthoptics (0), Dietetics (1417) - Breaches are in physiotherapy and dietetics. Both these services have a significant capacity/demand gap recognised by the commissioner.

SLT (574) - The longest wait is 74 weeks (520 days). The number of 13 week breaches was 955 at the end of March 2018 but had been reduced to 462 at the end of March 2019. This improvement was supported, in part, through capacity funded from Waiting List Initiative monies. WLI funding has not been repeated in FY1920 and so service capacity is reduced. Number of referrals continue to increase with referrals up by 12% in Jan – July compared to 2018. Both of these factors underpin the increase in breaches. Analysis of waiting lists confirms that majority of breaches are within Adult Community SLT and relate to Dysphagia. It has been recognised by commissioners that Adult SLT is under staffed by 4 WTE. Staff have been working beyond regional guidelines to manage demand. The capacity of the service has also been impacted by Maternity leaves and vacancies which have consistently reduced the capacity. Limited availability of trained agency/temporary staff has increased the difficulties of the service to match demand. The service has been required to prioritise Adult Inpatient demands to support early discharge from hospital and therefore efficient use of bed space. Adult Inpatient demands have significantly increased and this prioritisation has impacted Community SLT waiting list as community staff are redirected to support inpatient service. Since the WLI funding was removed, the numbers of breaches has begun to increase again.

Community OT/Paediatrics/Dementia Services/Learning Disability - The Rheumatology Service performance continues to deteriorate. Relatively small service overall with 1.56 wte staff impacted by rise in demand over the last number of months. A review of the service is underway to establish overall capacity of the service and identify potential efficiencies. Core Community Services have continued to gradually improve though overall staffing levels remain a concern. 20% reduction in capacity due to vacancies, sick leave etc. Action plan in place to maximise efficiency of service overall. Dementia services impacted by 2 Maternity leaves -no cover achieved.

Paediatrics continues to remain relatively stable with monthly performance meetings in place with operational AD

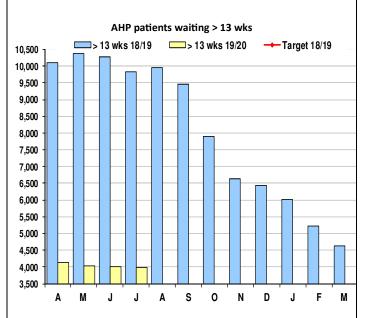

ACTIONS BEING TAKEN WITH TIME FRAME

Physiotherapy and Dietetics - Services continue to deliver contracted volumes and focus on areas of highest clinical risk. Group sessions have been rolled out across outpatient physiotherapy services in the Trust as well as a number of other initiatives aimed at reducing waiting times including validation of waiting lists. The Trust has decided to invest demography funding in physiotherapy which will address the capacity gap in this area. Elective access funding was received in 2018/19 for 3,100 physio and 371 dietetics assessments, which has resulted in a reduction of patients waiting over 13 weeks.

SLT - The service is implementing a range of plans to stabilise and then reduce numbers waiting and the length of wait. These include realigning current working practices based on prioritised demands, recruitment, use of agency staff, overtime clinics, increased hours for existing staff. Two permanent staff have been recruited and started in June 2019. Other actions include demand and capacity analysis, business case development to highlight and support the service, review of how LCID is used to capture activity, increase capacity and reduce DNAs through partial booking and develop care and treatment pathways, defining maximum inpatient demand and therefore minimum community capacity, and developing care and treatment pathways. A 6 day working week has been piloted and outcomes are being assessed to understand the impact on the Community waiting list.

Community OT/Paediatrics/Dementia Services/Learning Disability - Action plans are in place to manage the situation in Rheumatology, Paediatrics and Core Community.

Actions highlighted in previous reports are on-going, such as working with operational management to fast track recruitment processes, additional hours offered to staff, validation of waiting lists to ensure accuracy, movement of staff across localities to areas in greatest need, maximising use of clinic facilities and group sessions as appropriate, appointment of temporary staff to address longest waiters, appointment of Agency staff as appropriate and a review of assessment processes and documentation.

13 Week Breaches by Service Area

Dietetics – 1417 Occupational Therapy – 686 Orthoptics - 0 Physiotherapy - 1311

Podiatry - 0

Speech and Language Therapy - 574

SCS/MEM/WCF

FORECAST IMPACT ON PERFORMANCE

Physiotherapy and Dietetics - Demography funding will address the capacity gap in physiotherapy once staff are fully recruited, which should prevent the waiting list position from deteriorating further. Elective access funding will be required in 2019/20 to reduce further the number of patients waiting over 13 weeks.

SLT - It is predicted that without WLI investment the breach position will increase by approx. 40 - 50 per month. **Community OT/Paediatrics/Dementia Services/Learning Disability** - Extremely difficult to give accurate predictions of future performance as staffing levels are constantly changing.

Action plans in all areas are regularly being reviewed and updated to ensure services are maximising capacity.

Hospital Cancelled Appts

By March 2019, to establish a baseline of the number of hospital cancelled, consultant led, outpatient appointments in the acute programme of care which resulted in the patient waiting longer for their appointment and by March 2020 seek a

reduction of 5%.

(CPD 7.3)

CAUSES / ISSUES IMPACTING ON PERFORMANCE

These cancellations are for a variety of reasons including consultant sick leave or a requirement to attend court at short notice; however there are some cancellations due to the requisite notice not being given for annual or study leave.

ACTIONS BEING TAKEN WITH TIME FRAME

Escalation to management if clinics are being cancelled at <6 weeks' notice for any reason other than unforeseen circumstance. Reinforced awareness of the notice requirements for annual and study leave and will continue to monitor this at specialty level.

FORECAST IMPACT ON PERFORMANCE

Under review

			Cu	mulative	Target 1	998 – Cui	mulative	Actual 21	L84			

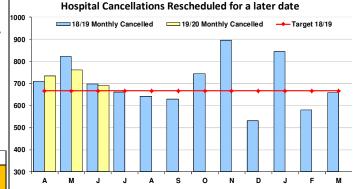

Target for 19/20; By March 2020 achieve 666 cancellations monthly, a 5% reduction based on 18/19 figures.

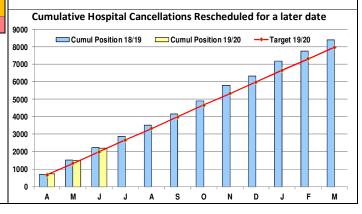

Cancellations where the date of appointment was changed, resulting in it being rescheduled for a later date.

Patients could also be impacted in one of the following ways:

- -Date of the appointment was changed, resulting in it being brought forward to an earlier date.
- -Time of the appointment was changed but no change in date.
- -Location of the appointment was changed but no change in date.

A breakdown of these are included for Indicator G2.

Pharmacy

Anti-biotic prescribing (CPD 2.2 (ii))

To reduce inappropriate antibiotic prescribing by 50% Taking 2017/18 as the baseline figures, secure in secondary care:

- a reduction in total antibiotic use of 1%, measured in DDD per 1000 admissions;
- a reduction in carbapenem use of 3%, measured in DDD per 1000 admissions;
- a reduction in piperacillin-tazobactam use of 3%, measured in DDD per 1000 admissions, and

EITHER

 that at least 55% of antibiotic consumption (as measured in DDD per 1000 admissions) should be antibiotics from the WHO Access AWaRe* category,

OR

 an increase of 3% in use of antibiotics from the WHO Access AWaRe* category, as a proportion of all antibiotic use.

Interpreting the AMC charts

- Fig 5 7: The red annual target line represents the target reduction from the 17/18 baseline. Each Trust should be on or below this rate to achieve their target for the given year. The monthly rate may fluctuate above or below the annual target rate.
- Fig 8: The target for the proportion in the AWARE Access category was either 55% of total in the baseline year (2017/18) or if this was not realistic, then a 3% increase from the baseline. The monthly proportion may fluctuate above or below the annual target proportion.
- Please note the annual target and monthly rates for all AMC charts are provisional until the end of the financial year and subject to change. Changes may be partly attributable to the update of monthly admissions and to the monthly update of AMC data for the previous 12 months.

The figures above have been taken from PHA Monthly Target Monitoring.

*For the purposes of the WHO Access AWaRe targets, TB drugs are excluded.

Pharmacy

Medicine Optimisation By March 2019, all Trusts must demonstrate 70% compliance with the regional Medicines Optimisation Model against the baseline established at March 2016. (CPD 2.6)

Key Quality Improvement Activities this period

- Management of Change Enhanced Weekend Pharmacy Service weekend working implemented in Causeway, November 2018. Optimising weekend working 9 to 5 at Antrim.
- Begun to explore potential of using HS21 prescriptions in Acute Care at Home Setting was put on hold
- Pilot medication review of patients attending ED but not admitted. Data being collected on hold due to resources.
- Pilot antibiotic review kit (ARK) revise and review in Antrim. This is on-going.
- The Future Role of Clinical Technicians in Counselling Clexane Administration on hold in NHSCT as the regional clinical technician group are developing a general MMAP programme for counselling.
- Gentamicin chart pilot in Antrim to improve gentamicin prescribing and antimicrobial stewardship ongoing.
- Project on self-administration of insulin started. Baseline data collection February/March 2019.
- Discharge follow-up pharmacists in post and training underway
- Outpatient Parenteral Antimicrobial Therapy (OPAT)/antimicrobial stewardship pharmacy staff in post and training underway.
- Intermediate care Self-administration of medicines (SAM) guidance and booklet developed in November 18.

Key Quality Improvement Activities for next period

- ARK study consider further roll out.
- Management of change continue with improving 9 to 5pm weekend working and refresh initial proposal for Antrim. Review Causeway weekend working.
- SBRI FAST a regional approach is being investigated following phase 2.
- Improve communication between pharmacy staff regarding patient's journey. SBRI FAST has potential to refer patients a regional approach is being investigated following phase 2.
- Develop more formal links with GP Federation Pharmacists. Meetings held with the leads in the Northern Area—set up regular meetings to progress for example discharge follow up.
- Re-designing the process for conducting Ward Controlled Drug audits in Antrim Area hospital a database is being developed to monitor ward compliance with CD checks.
- Pilot an opioid post-op leaflet in Surgery.
- One stop dispensing training for nursing staff.
- OPAT/antimicrobial stewardship team to progress with phase one.
- Intermediate care finalise the SAM guidance and booklet.

Risks / Issues

- Need to continue discussions regarding carrying out a recruitment drive for technicians.
- Continue discussions around improving links with community pharmacy and their MO role.
- Inability to implement initiatives due to lack of resources.

EM

Unscheduled Care (Including Delayed Discharges)

Unscheduled Care

ED 4 hour By March 2019, 95% of patients attending any type 1, 2 or 3 emergency department are either treated and discharged home, or admitted, within four hours of their arrival in the department (CPD 4.4)

CAUSES / ISSUES IMPACTING ON PERFORMANCE

Both sites have experienced significant increases in demand in the early part of 2019/20 compared to the previous year. Antrim's over-75 attendances rose by 12% and Causeway's by 7% in April-June 2019 compared to the same period last year. This increased throughput and frailty of patients adds pressure to the hospital and increases the challenge of meeting unscheduled care performance targets. It is recognised by the Board and DoH that Antrim Hospital is short of beds based on existing demand, and it is unlikely that unscheduled care targets can be met until this bed deficit is fully addressed.

ACTIONS BEING TAKEN WITH TIME FRAME

The Trust is continuing to implement a significant reform of unscheduled care as part of its RAMP programme. This is focused on the following workstreams:

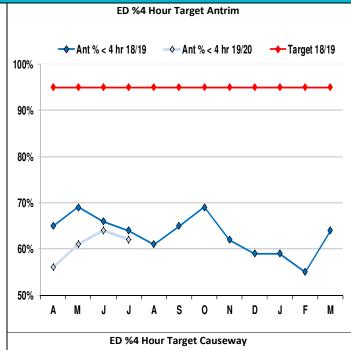

- Reduction of attendance / admission to hospital, including further development of ambulatory
 pathways and the phased implementation of an Acute Care At Home service and a Programmed
 Treatment Unit
- Development of a Direct Assessment Unit in Causeway Hospital focused on ambulatory treatment of the frail elderly
- Streamlining discharge processes and planning and review the MDT planning processes currently in use
- Review of medical pathways in Antrim Hospital including the further development of the acute medicine specialty
- Reprofiling the bed base in Causeway Hospital to reduce the number of medical outliers and develop a Medical Assessment Unit.

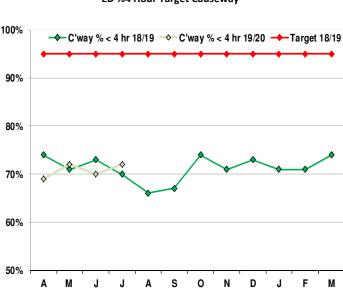

The Trust also opened a new medical ward in Antrim Hospital in July 2019.

FORECAST IMPACT ON PERFORMANCE

Through the implementation of its RAMP work streams and additional bed capacity, the Trust is aiming to maximise unscheduled care performance in 2019/20.

Unscheduled Care Triage By March 2019, at least 80% of patients to have commenced treatment, following triage, within 2 hours. (CPD 4.5)

CAUSES / ISSUES IMPACTING ON PERFORMANCE

The ongoing pressures on patient flow brought about by increased demand and limited bed stock frequently cause crowding in ED, which reduces the service's ability to treat new arrivals in a timely manner. The Trust's unscheduled care reform programme will be addressing the whole system issues impacting on patient flow; however targets are unlikely to be fully met before adequate inpatient bed capacity is in place on the Antrim site.

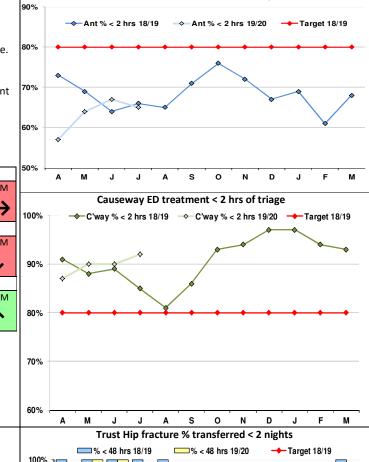

ACTIONS BEING TAKEN WITH TIME FRAME

The Trust's unscheduled care reform programme will be addressing the whole system issues impacting on patient flow (see CPD 4.4).

FORECAST IMPACT ON PERFORMANCE

Targets are unlikely to be fully met before adequate inpatient bed capacity is in place on the Antrim site.

Patient Discharge Complex By March 2019, ensure that 90% of complex discharges from an acute hospital take place within 48 hours (CPD 7.5)

CAUSES / ISSUES IMPACTING ON PERFORMANCE

There were 112 delayed discharges across the 2 hospital sites during July 2019. The increasing number of delays is reflective of the complexities and needs of an aging patient group.

Acute Based Delays totalled 59 of which 40 delays can be attributed to acute assessment and care planning processes. 16 delays were the result of client choice and family issues and 3 delays were caused waiting on a step down bed in WAH. Given the complexities of this patient group it must be noted that significant work is required by hospital social work staff and other hospital staff to prepare these patients for discharge including the on-going assessment of need and treatment.

Community Delays totalled 49.

Domiciliary Care: During July 2019 a total of 94 patients discharged home from Antrim Area Hospital, with a sourced domiciliary package of care in place. Similarly, in Causeway Hospital a total of 61 patients discharged home with a sourced domiciliary package of care in place. There were 18 complex delays which can be attributed to difficulties being encountered when trying to source a package of care, caused by a lack of capacity within Trust Core Services and the Independent Sector provision.

Step Down Community Beds: There were a total of 10 delays caused as a result of waiting to source an appropriate step down community bed.

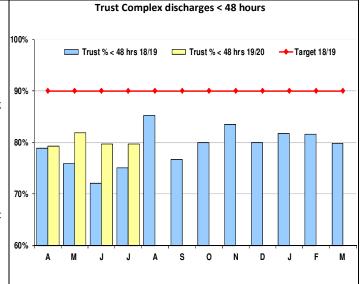

Placements: 20 delays were caused were relating to placement planning.

During July 2019 levels of demand on ED and subsequently acute bed based services have placed significant levels of demand in facilitating discharges to community settings

ACTIONS BEING TAKEN WITH TIME FRAME

Placements: The need for the availability of 7 day pre-assessments by nursing and residential homes has been highlighted at the Independent Homes Reference Panel.

Contracts Department liaise on a daily basis with ISP providers to secure packages of care. The use of Contingency Beds as a suitable alternative is available and should be used as a temporary arrangement. A Domiciliary Care working group has been convened to agree an action plan that will result in increased capacity throughout the system.

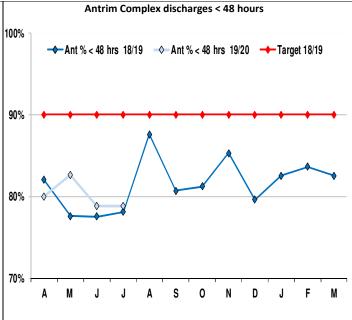

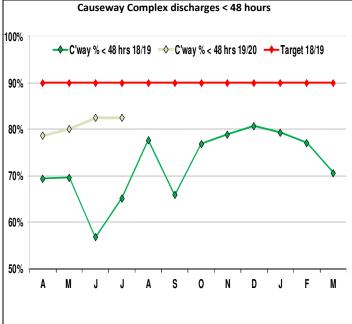

FORECAST IMPACT ON PERFORMANCE

Domiciliary Care: If demands for domiciliary care provision remains at current levels and contingency arrangements are not implemented, this will continue to put a pressure on this target. Creating capacity is a slow process, as recruitment within this sector is difficult. Focus on reviewing existing service users based on assessed need continues in the community providing the opportunity for the utilisation of recycled hours.

Placements: Where there is a determination that there is the likelihood of permanent care being required, discharge to a community bed for the decision to be made outside the acute setting is promoted. However, for a small number of cases direct admission from the acute setting is in the best interest of the service user. In these situations there may be a delay incurred in securing a discharge within the 48 hour period whilst waiting a preadmission assessment from a residential or nursing home.

Patient
Discharge
Complex
By March
2019, ensure
that no
complex
discharge
takes more
than seven
days
(CPD 7.5)

CAUSES / ISSUES IMPACTING ON PERFORMANCE

26 out of the 112 delays in July 2019 were greater than 7 days.

Acute Based Delays totalling 5 can be attributed to acute assessment and care planning processes for this very complex patient group. A further 3 delays were the result of client choice and family issues. There was one delay incurred waiting on a step down bed.

Community Based Delays totalling 16 of which 2 delays can be attributed to the sourcing of a domiciliary package of care; 9 delays were relating to placement planning and 4 delays required step down beds.

ACTIONS BEING TAKEN WITH TIME FRAME

The use of contingency beds as a suitable alternative is available and should be used as a temporary arrangement. It is critical that the Managing Choice for Discharge from Inpatient Beds Protocol is implemented in a timely fashion to reduce the number of 7 day breaches.

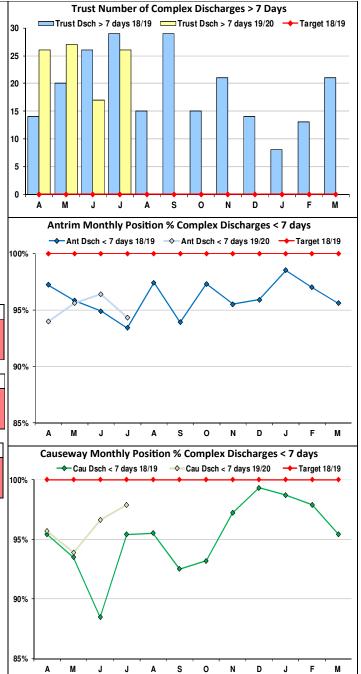

FORECAST IMPACT ON PERFORMANCE

Placements: Where there is a determination that there is the likelihood of permanent care being required, discharge to a community bed for the decision to be made outside the acute setting is promoted. However, for a small number of cases direct admission from the acute setting is in the best interest of the service user. In these situations there may be a delay incurred in securing a discharge within the 48 hour period whilst waiting a preadmission assessment from a residential or nursing home.

Patient
Discharge
Non complex
By March
2019, ensure
that all noncomplex
discharges
from an acute
hospital take
place within
six hours.
(CPD 7.5)

CAUSES / ISSUES IMPACTING ON PERFORMANCE

40% of simple discharges breaching the 6-hour target are due to patients waiting for a cardiology intervention in the Belfast Trust. The remainder are related to a range of issues including waiting for medicines or transport.

ACTIONS BEING TAKEN WITH TIME FRAME

Improved use of the discharge lounge on both acute sites means patients can often be moved out of their inpatient bed while waiting, so that the delay does not impact on the overall flow of the hospital. A 'Home for 1' project is underway in both acute sites, aiming to increase the number of patients leaving the ward in the morning, and further improve use of the discharge lounge.

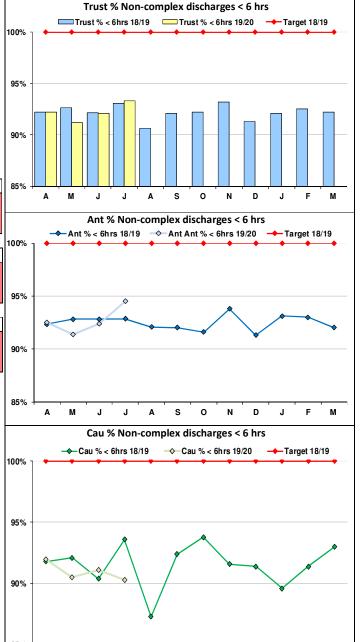

FORECAST IMPACT ON PERFORMANCE

Adult Mental Health Waits By March 2019, no patient waits longer than nine weeks to access adult mental health services (CPD 4.13) CAUSES / ISSUES Within the Adult for Older Peoples Community Ment number of referration Larne Carrick hav Newtonabbey has not services (CPD 4.13) The service continuation of the Division continuation of

CAUSES / ISSUES IMPACTING ON PERFORMANCE

Within the Adult Mental Health service there were 4 clients waiting to be seen by the Community Mental Health for Older Peoples Service (Functional Area) in April 2019. The reason for these waits is a reduced number of Community Mental Health Nurses in the Larne Carrick and Newtownabbey teams which has resulted in increased number of referrals for Consultants.

Larne Carrick have 2 permanent vacancies and have been unable to recruit from recent interviews.

Newtonabbey has 1 vacancy as a result of long-term absence.

The service continues to monitor this closely.

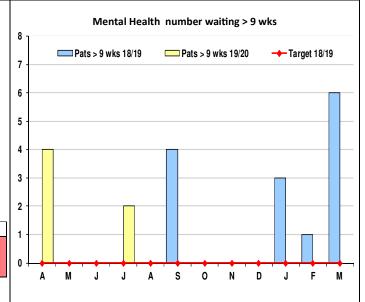

ACTIONS BEING TAKEN WITH TIME FRAME

The Division continues to monitor capacity and demand closely.

FORECAST IMPACT ON PERFORMANCE

Continue to anticipate any potential breaches.

Psychological Therapies Waits

By March 2019, no patient waits longer than 13 weeks to access psychological therapies (any age). (CPD 4.13)

CAUSES / ISSUES IMPACTING ON PERFORMANCE

Breaches of the performance target are evident at the end of July 2019 across 3 areas within psychology services. Performance is being impacted in the main by LD and Clinical Health Psychology services.

PTS (mental health) has largely come out of the breach position with 4 breaches at the end of July from a total WL of 315 (longest wait 113days). Although it should be noted that the wait for therapy following initial assessment is growing. Several strategies (e.g., group intervention plan, recovery strategy) have been developed to address this issue.

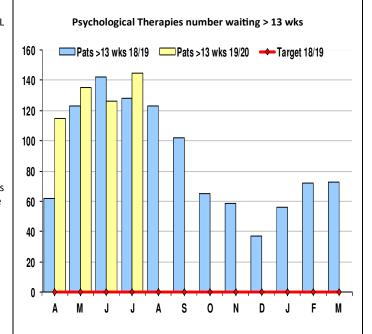

Clinical Health Psychology – At July month end the Clinical Health Psychology Service has 85 breachers (41%) of total waiting list of 208 with a longest wait of 321 days (oncology). We remain on track to improve this position considerably by quarter 3 as a successful pilot Service delivery model has now been rolled out (August 2019). There remains a loss of capacity (since January 2019) from a vacant post (e-req recently declined due to insufficient funding within budget) which needs to be resolved to prevent waiting times for therapeutic interventions from deteriorating

Learning Disability (adult and children) – Learning Disability Services currently has 56 breachers (32%) of a total waiting list of 174 with a longest wait of 197 days. Whilst the number of breaches has increased from last month's position (+8) the total number of waiters has reduced (-3) and the longest wait has also reduced (-37 days). There has been some reduction in capacity in relation to qualified staff and absence earlier in the year impacted on waiting times. Some vacancies have been filled however one clinical psychologist post remains vacant. Increased capacity will improve waiting times if this post can be filled.

ACTIONS BEING TAKEN WITH TIME FRAME

On-going engagement with referring agents re other models of provision during periods of reduced capacity within the service. This is particularly significant in Clinical Health Psychology where demand for the service is significantly higher than previous years. Ongoing use of agency to assist during periods of reduced capacity. Skill mix in place across all effected services.

Womens, Childrens and Families Services Children in CAUSES / ISSUES IMPACTING ON PERFORMANCE WCF Care The Division provides a Delegated Statutory Functions (DSF) report in May and November which outlines all the **Placement** data requested by the Department in relation Services provided by the Trust through Safeguarding, LAC, Fostering, Adoption and Residential and 16+ services. DSF reporting requires the trust to report total number of change placement moves during the reporting period (April to September and October to March separately). The By March information requested here is different to that requested under DSF. Reporting is not available to determine 2019, the those placement moves that were in cases where the child has been in care for more than 12 months. proportion of The following data has been prepared for DSF reporting. In March 2017 there were 647 looked after children. This children in number increased to 671 by March 2018. In this time there were 69 placement moves from March 2017 to care for 12 September 2017 and 78 placement moves from October 2017 to March 2018 - across all placements (not just months or those in care > 12 months). A number of placement moves across these periods may relate to the same longer with no placement The service has provided assurance that placement changes involving long term placements are uncommon and are only undertaken where necessary. change is at least 85%. ACTIONS BEING TAKEN WITH TIME FRAME (CPD 1.10) The number of Looked after children has increased remained relatively static compared with last year, however the number of complex cases is increasing. The service continues to develop and implement recruitment strategies targeting foster carers across the geographic region, with particular skills and in support of the full age range of children. % Children with no placement change Oct Nov Dec Feb Mar Mav Jun Jul 82% -Sept 17 Information source - Annual OC2 Survey to Sept 17 Children in CAUSES / ISSUES IMPACTING ON PERFORMANCE Care In the period April 2017 to March 2018 there were 15 Adoption Orders granted. Of these 5 were completed Adoption within the 3-year target. The Trust endeavours to achieve this target, but is experiencing difficulties regarding court time frames. There By March have been serious delays in court regarding adoption and freeing applications due to a supreme court ruling. 2019, 90% of Frequently younger siblings are born within the time frame which impacts on the final order for the older siblings. children, who are adopted **ACTIONS BEING TAKEN WITH TIME FRAME** from care, are The service is closely monitoring the timeline for all children and can highlight where issues are arising. The adopted service endeavours to review cases with the Judiciary to ensure timely completion of the adoption process. within a three vear time 2015/16 2016/17 2017/18 frame (from % Children adopted from care within 3 years of ┰ 52% 60% 40% last entering care date of last Information source - Annual AD1 to March 18 admission) (CPD 1.10)

CAMHs

Waits By March 2019, no patient waits longer than 9 weeks to access child and adolescent mental health services. (CPD 4.13)

CAUSES / ISSUES IMPACTING ON PERFORMANCE

The performance target of 9 weeks historically related to Specialist Step 3 CAMHS only. This specialist service has maintained a zero breach position since August 2015. Since April 2018, the Step 2 CAMHS Service had been incorporated within this target. Within the NHSCT Step 2 services are provided by the Children's Early Intervention Service (CEIS), which is a combination of the recently commissioned Primary Mental Health Service (PMHS), and the NHSCT Family Centre Service. Step 2 service provision for low-moderate emotional health and well-being needs and does not deliver services to those YP with severe and enduring mental health needs. *The NHSCT had reported on ALL Step 2 referrals, however the HSCB has now clarified that this 9 week access target for is only applicable for those referrals with a mental health component. Other Step 2 services for behavioural and parenting support referrals are to be reported separately through DSF arrangements. There are 130 breaches in CEIS (Primary Mental Health referrals); Longest wait is 183 days. Due to additional information being received a referral moved from FS to PMH waiting lists which has affected longest waiter.

- Increasing referral rate. 2018/19 referrals were 143 on average per month up from 72 per month in the previous year. This is a 100% increase in referrals. (Primary Mental Health referrals are approx. 29% of demand.)
- Staff shortages due to sick leaves, maternity leaves and ongoing HR/ER processes are negatively affecting
- Community and Voluntary Sector capacity is limited, and reactive to funding availability. For example The ART project has now been taken over by Victim Support and has restricted its remit -only accepting children over 8 who have been abused-so other issues around trauma must be absorbed by CEIS

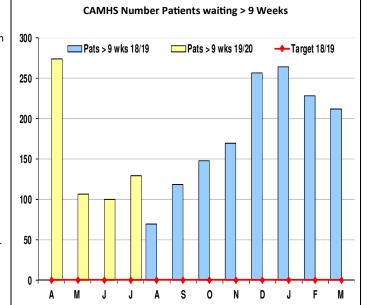

ACTIONS BEING TAKEN WITH TIME FRAME

- On-going management of referrals and allocations ensures that the number of breaches remains at zero for step 3 referrals
- Clarification from commissioners that 9 week target refers only to referrals with a mental health component.
- A CEIS Service Improvement plan has been developed to address breaching position
- Waiting List alignment and quality assurance has been completed to identify Primary Mental Health Support, Behavioural support and Parenting support streams of demand
- Agreement has been reached with HSCB to update all reports since Jan 2018 and re-present them with only Primary Mental Health Support referrals included
- Waiting list initiative monies had been used for overtime clinics which have helped address the increased referrals and slightly reduced the breach position, this money has now ceased and has not been repeated
- Parenting Programmes have been increased to allow capacity for FS referrals to be managed
- Agency staff have been recruited to support delivery
- Part time staff have being offered increased hours
- CAPA methodology has been implemented and capacity and demand is reviewed on a weekly basis, CNA and DNA appointments are refilled.

FORECAST IMPACT ON PERFORMANCE

Despite a short term increase in breaches the CEIS Service Improvement Plan trajectory identifies that by streaming demand into Primary Mental Health support, Behaviour Support and Parenting Support, that breaching of Step 2 mental health referrals reduce to zero by Feb 2020. The effects of the improvement plan will begin to show during August and September with the zero breach position being achieved in line with the projection.

Community Care Direct CC/MHLD/WCF **Payments** By March 2019, secure a 10% increase in the number of direct payments to all service users. (CPD 5.1) Carers' By March 10% increase in the number

CAUSES / ISSUES IMPACTING ON PERFORMANCE

Feedback from service users would indicate that the Community Care client group find the process of employment and financial accountability difficult.

ACTION TAKEN & TIMESCALES FOR IMPROVEMENT

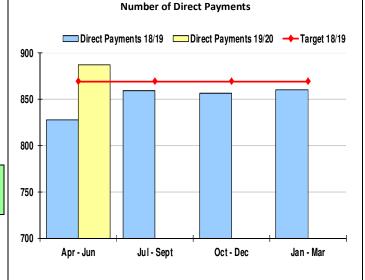

All SW staff have attended or have planned attendance at Direct Payment training, to ensure understanding and requirements of process to facilitate informed discussions with service users considering uptake of direct payments.

FORECAST IMPACT ON PERFORMANCE

It is anticipated that there will be modest growth in this sector.

Jul	Aug	Sept	Oct	Nov	Dec	Jan	Feb	Mar	Apr	May	Jun	TOPM
	859			856			860			887		个

790 direct payments March 18 (Baseline). 2018/19 target 869 by March 19 quarter.

Assessments 2019, secure a of carers' assessments offered to carers for all service users. (based on 17/18 figures)

(CPD 6.1)

CAUSES / ISSUES IMPACTING ON PERFORMANCE

ACTION TAKEN & TIMESCALES FOR IMPROVEMENT

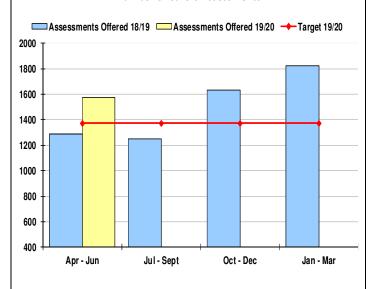

Training has been provided to staff in the completion of Carers Assessments.

FORECAST IMPACT ON PERFORMANCE

Staff will continue to focus on promoting Carer's assessments and undertake these where carers are willing to engage.

⁻ The tables above excludes Endoscopy procedures in Gastro, GS & Medicine.

⁻ Elective Inpatient activity is based on Admissions (1st FCE only)

^{- 2019/20} Volumes are Draft.

19/20 Elective Inpatients, Daycases & New Outpatients by Specialty where the variance is more than -10% at a cumulative position

of 17 weeks (28 July 19)

Specialty	Elective Inpatients	Daycases	New Outpatients	Reason for Variance	Action Being Taken
Dermatology			-27%	Capacity has shifted to day surgery to accommodate very high red flag demand. Core volumes do not take account of significant phototriage activity. Consultant absence in the early part of the financial year has also led to a reduction in volumes.	SBA to be reviewed to reflect changes in the service model
ENT	-63%			IPDC split not agreed. Inpatient volumes mainly impacted by capping of lists due to unscheduled pressures.	Elective admissions continue to be capped due to unscheduled pressures, which will result in an ongoing reduction in inpatient volumes.
Gastroenterology		-22%		Reduction in IPDC volumes due to shift in activity to outpatients with procedure.	IPDC SBA under review.
General Medicine			-16%	Shift of activity to care of the elderly specialty clinics	SBA to be rebalanced between general medicine and care of the elderly, to reflect demand profile
General Surgery	-56%	-37%	-16%	IPDC SBA under discussion agreed as not appropriate and to be rew orked during 2019/10. Outpatient clinic capacity converted to breast surgery to help accommodate increasing demand.	IPDC SBA to be remodelled.
Obs and Gynae (Gynaecology)	-38%	-33%	-13%	Under utilization of both Daycase and Inpatient Lists due to a number of factors which include the majority of daycase activity taking place on peripheral sites and the necessity to risk stratify the acuity of patient who can be placed on these lists. Shift of activity from daycase to outpatients on the Causeway site.	HSCB will be undertaking an SBA review exercise in 2019/20 which should ensure that all activity is correctly accounted for.
Gynae (Urodynamics)			-60%	Modernised treatment pathways have resulted in a shift of activity from urodynamics to other parts of the gynae service.	HSCB will be undertaking an SBA review exercise in 2019/20 which should ensure that all activity is correctly accounted for.
Nephrology			-23%	Lack of demand.	
Endoscopy	-2	3%		It is not possible to provide all lists at present due to staffing and physical capacity issues.	There are several nurse endoscopists in training who will help to increase volumes once fully operational.

ABSENCE

The Trust monthly sickness absence percentage for June 2019 was 6.87%, an increase of 0.33% compared to the figure reported for May 2019 (6.54%). The Trust cumulative absence percentage for the period 1st April 2019 to 30th June 2019 was 6.66%, a figure which is 0.4% higher than the Trust target of 6.26% and 0.28% higher than the figure reported for the same period in 2018 (6.38%). During the period 1st April - 30th June 2019, 3.39 days were lost per employee due to sickness absence.

STAFF HEALTH AND WELLBEING

MENTAL HEALTH CHARTER

The Trust has signed up to the Equality Commission's Mental Health Charter. The Charter sets out the Trust's commitment to the creation of a work environment where staff can be open about experiencing mental health problems and get the support that they need.

SCHWARZ ROUNDS

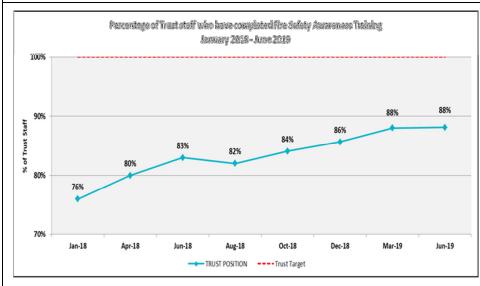

Schwarz Rounds are now underway within the Trust. The Rounds provide a structured forum where all staff, clinical and non-clinical, come together regularly to discuss the emotional and social aspects of working in healthcare.

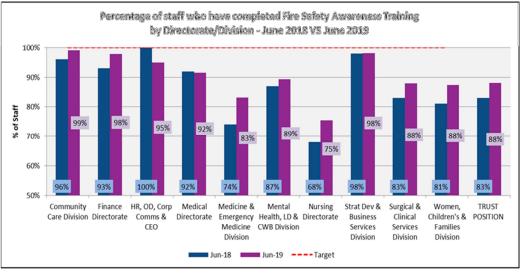

HEALTH AND WELLBEING FAIR

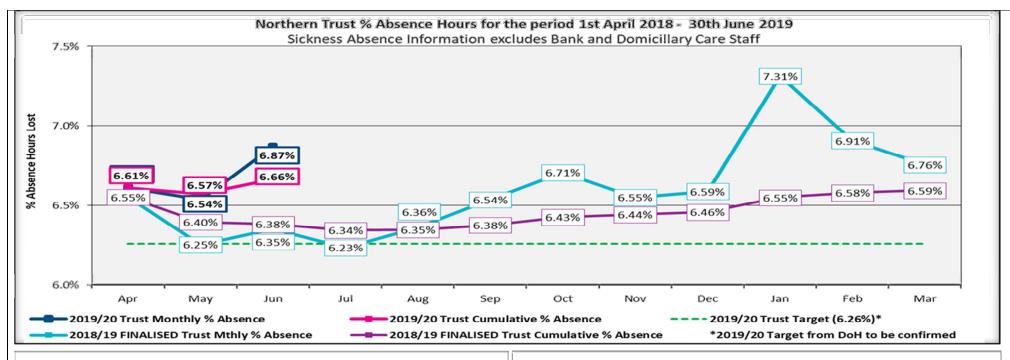

On 13th June, the Trust held a Staff Health and Wellbeing Fair at Causeway Hospital. At the event, over 300 members of staff were given the opportunity to undertake a number of free health checks and consider the importance of their personal health and wellbeing.

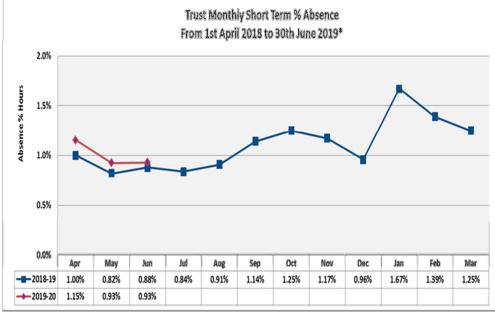

CYCLING SELFIE COMPETITION

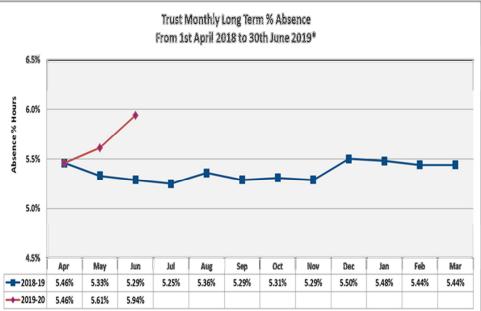

During May and June, members of staff were encouraged to take part in the annual Trust Cycling Selfie Competition. The event helps to publicise both the benefits of cycling and the availability of the Trust Cycle2Work Scheme.

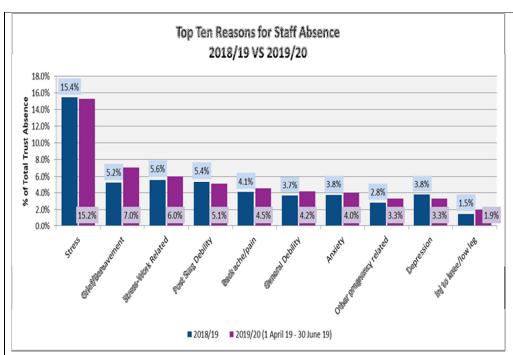

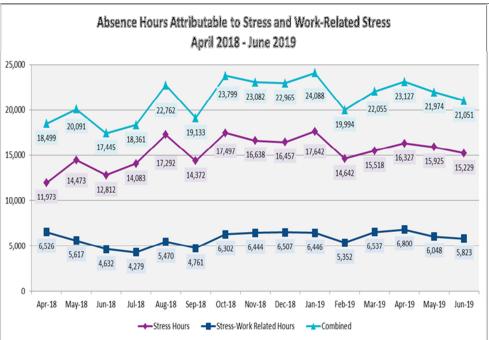

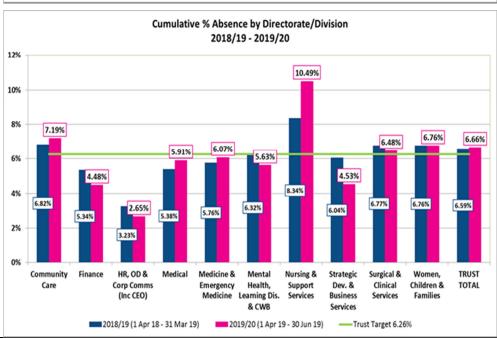

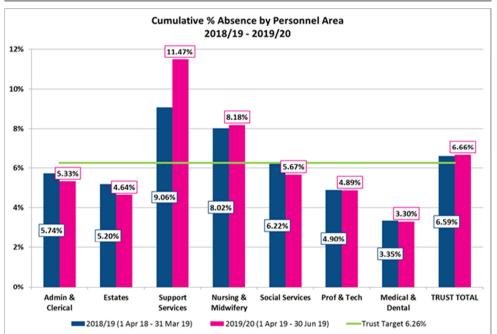

^{*} Long and Short term absence figures are published on a monthly basis and exclude the impact of late absence recording

6.0 Appendix

CPD Targets and Indicators pending clarification

The following 2018/19 Commissioning Plan Direction targets & indicators are to be included for Trust Board monitoring however no associated technical guidance or measurable outcomes are currently available. As guidance becomes available they will be included in the main body of the Trust Board report. RAG rating is based on the Trusts 2018/19 annual delivery plan (TDP).

Target / Indicator	ailable. As guidance becomes available they will be included in the main body of the Trust Board report. RAG rating is based on the Trusts 2018/19 annual delivery plan (Description	2018/19 TDP RAG Rating
2.1	By March 2019 all HSC Trusts should have fully implemented phases 2, 3 and 4 of "Delivering Care", to ensure safe and sustainable nurse staffing levels across all emergency departments, health visiting and district nursing services.	A
2.5	By March 2019, review and regionally agree standardised operational definitions and reporting schedules for falls and pressure ulcers	A
2.8	During 2018/19 the HSC, through the application of care standards, should continue to seek improvements in the delivery of residential and nursing care and ensure a reduction in the number of (i) residential homes, (ii) nursing homes, inspected that (a) receive a failure to comply, and (b) subsequently attract a notice of decision, as published by RQIA.	A
B1	Staffing levels as reported in regular reports from PHA Delivering Care Implementation Board.	N/A
В9	Number of revisits required to achieve compliance in (i) residential homes, (ii) nursing homes, in 2015/16 and 2016/17, as published by RQIA.	N/A
3.1	By March 2019, all patients in adult inpatient areas should be cared for in same gender accommodation, except in cases when that would not be appropriate for reasons of clinical need including timely access to treatment.	R
3.4	By March 2019, to have arrangements in place to identify individuals with palliative and end of life care needs, both in acute and primary settings, which will then support people to be cared for in their preferred place of care and in the manner best suited to meet their needs.	G
C1	Implementation of a protocol to support the identification of patients with palliative and end of life care needs in Primary Care systems. [Source: PHA/ HSCB evaluation report of agreed protocol]	N/A
5.2	By March 2019, all service users and carers will be assessed or reassessed at review under the Self-Directed Support approach, and will be offered the choice to access direct payments, a managed budget, Trust arranged services, or a mix of those options, to meet any eligible needs identified.	G
5.4	By March 2019, have developed baseline definition data to ensure patients have timely access to a full swallow assessment.	G
5.5	By March 2019 Self Directed physiotherapy service will be rolled out across all Health and Social Care Trusts.	G
6.3	By March 2019, to create a baseline for the number of young carers receiving short breaks (ie non-residential).	G
8.3	By March 2019, to have completed the first phase of the implementation of the domiciliary care workforce review.	G
8.9	By March 2019, to have an agreed and systematic action plan to create a healthier workplace across HSC and to have contributed to the Regional Healthier Workplace Network as part of commitments under PfG.	G
8.12	By March 2019, to have developed and commenced implementation of a training plan on suicide awareness and suicide intervention for all HSC staff with a view to achieving 50% staff trained (concentrating initially on frontline staff) by 2022 in line with the draft Protect Life 2 strategy.	G
8.13	By March 2019, Dysphagia awareness training designed by speech and language therapy to be available to Trust staff in all Trusts.	G
