User Consultation – Benefit Statistics Summary Publication

DfC have launched a user consultation exercise in relation to the Benefit Statistics Summary publication. We are reviewing the format, frequency and range of outputs published.

We want to hear from people who use the figures within the Benefit Statistics Summary. We would like to find out what people use the statistics for and to make sure that the publication is as useful as it can be. We also wish to assess how we communicate with users on an ongoing basis.

To respond to this consultation, please complete the consultation form on the following link: <u>https://www.communities-ni.gov.uk/consultations/benefit-statistics-summary-publication-user-consultation</u>

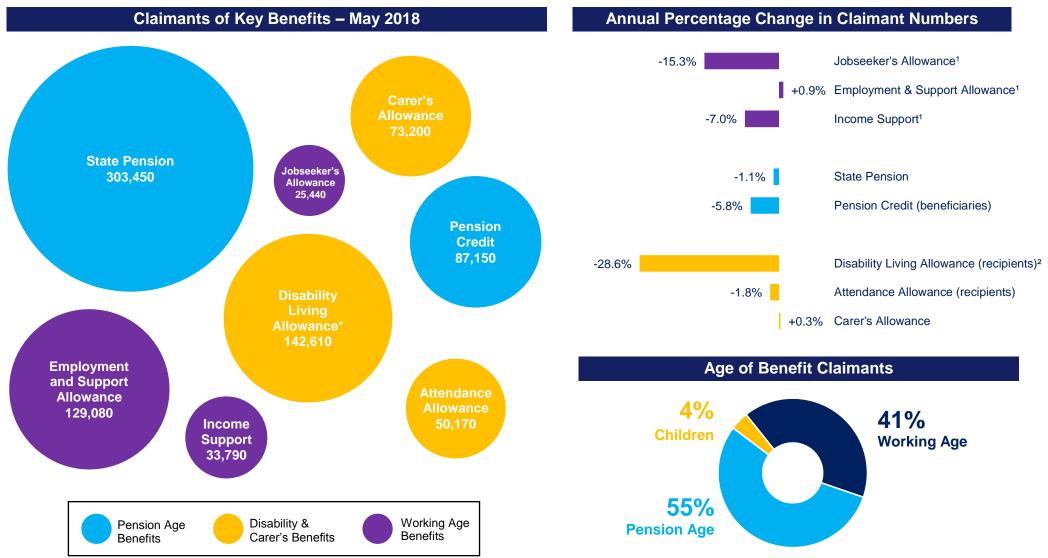

Alternatively, a hard copy can be requested by emailing <u>asu@communities-ni.gov.uk</u>

The consultation period runs from 29th August 2018 to 24th October 2018.

Many thanks for your time.

The Northern Ireland Benefit Statistics Summary provides an up to date and concise overview of the main benefits administered by DfC. More detailed statistics are available as supplementary tables for each benefit and are available on the DfC website at: <u>https://www.communities-ni.gov.uk/topics/benefits-statistics</u>

come Support.

¹ Universal Credit (UC) is being introduced on a phased geographical basis in Northern Ireland. In areas where UC has been introduced there will be no new claimants to Income-based JSA, income-related ESA and Income Support. ² The fall in DLA claimants is due to the introduction of Personal Independence Payment (PIP) on 20th June 2016. PIP statistics are currently published separately as Experimental Statistics.

Figures typically refer to claimants although Disability Living Allowance, and Attendance Allowance figures refer to recipients (those in receipt of a payment). Pension Credit refers to beneficiaries (claimants and partners).

What you need to know

The Department for Communities (DfC) publishes the Benefits Statistics Summary Bulletin each quarter. The DfC Benefit Statistics Summary brings together key National Statistics on the main DfC administered benefits.

Detailed **Personal Independence Payment (PIP)** figures are not yet included within this publication and are published separately as Experimental Statistics until assessed as National Statistics. PIP statistics are available <u>here</u>.

Similar statistics on **Universal Credit (UC)**, which is being introduced in Northern Ireland on a phased geographical basis from September 2017 to December 2018 are not included in this publication but will be published separately when available.

Housing Benefit statistics are published in a separate publication. Housing statistics can be found here.

Data notes

Figures are rounded to the nearest ten to protect individual records. Some additional disclosure control has also been applied. Figures are only slightly affected by these procedures.

Totals may not sum due to rounding. Percentages are rounded to whole numbers.

Additional tables and data

In addition to the summary document, there are a large number of tables which enable the user to delve into further detail of each benefit. These are provided to the user as:

- Supplementary benefit statistics tables for each Benefit Statistics Summary release, Excel spreadsheets are produced containing a large number of tables with much more detailed breakdowns for each DfC administered benefit and also client group analysis: https://www.communities-ni.gov.uk/topics/benefits-statistics
- Jobseeker Statistics for Northern Ireland statistics are available via NOMIS: <u>https://www.nomisweb.co.uk/Default.asp</u>
- The Department for Work and Pensions (DWP) statistics are available at: https://www.gov.uk/government/organisations/department-for-work-pensions
- Geographic statistics are available on NINIS: <u>http://www.ninis.nisra.gov.uk/</u>

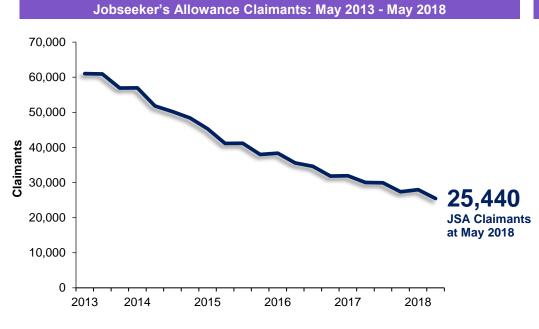

Further information on individual benefits including eligibility criteria is available from NI Direct: https://www.nidirect.gov.uk/information-and-services/money-tax-and-benefits/benefits-and-financial-support

About these statistics

All statistics are based on 100% extracts from the benefit administrative systems. Data is partially validated and is deemed of sufficiently high quality to report on. Data is extracted at 2 weekly, 4 weekly or 6 weekly intervals. Data is represented as end of reported month to aid presentation, but actual extract data will not generally be exactly this date. The statistics show the number of people claiming benefit on the extract date.

The United Kingdom Statistics Authority has designated these statistics as National Statistics, in accordance with the Statistics and Registration Service Act 2007 and signifying compliance with the Code of Practice for Official Statistics.

Jobseeker's Allowance – National Statistics

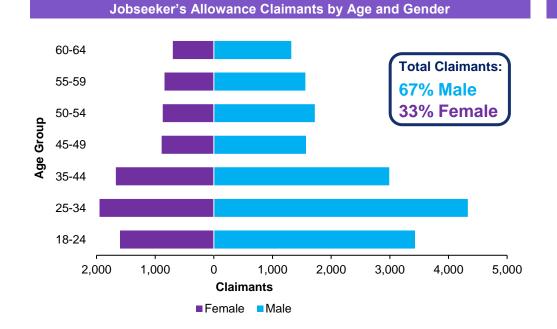

Key Facts

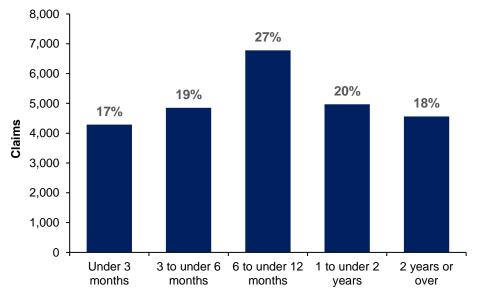

The official source of JSA figures is the DfE/ONS claimant count measure; this is seasonally adjusted and includes clerical cases. Details can be found <u>here</u>. The DfC JSA figures are presented here to enable cross-benefit analysis and provide a wider range of breakdowns.

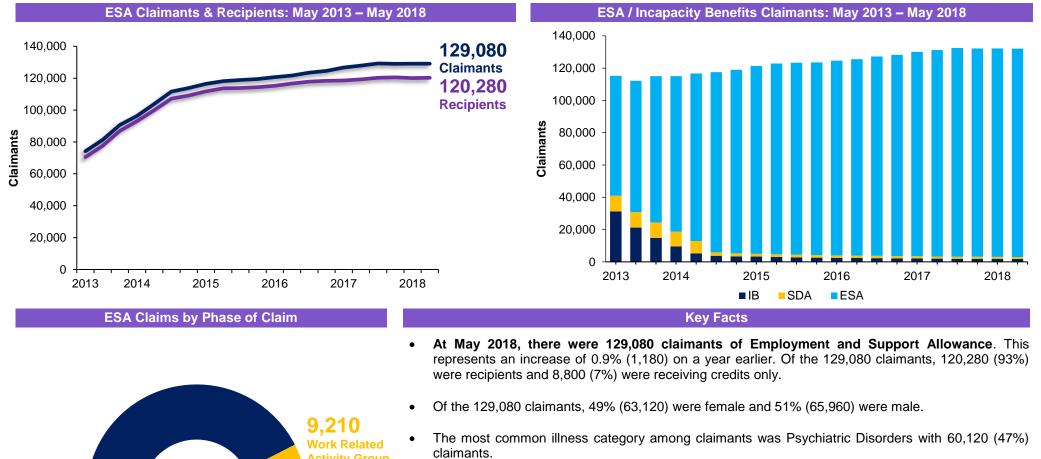

- The number of JSA claimants is largely dependent on the state of the economy and the availability of jobs. JSA figures are also impacted by the phased introduction of Universal Credit (UC). In areas where UC has been introduced, there will be no new claimants to Income-based JSA.
- At May 2018, there were 25,440 claimants of Jobseeker's Allowance. This represents a decrease of 15.3% (4,590) on a year earlier and a decrease of 9.0% (2,520) since February 2018.
- Of the 25,440 claimants, 92.2% (23,450) were recipients and 7.8% (1,990) were receiving credits only.
- The average weekly Jobseeker's Allowance benefit payment is £75.00.

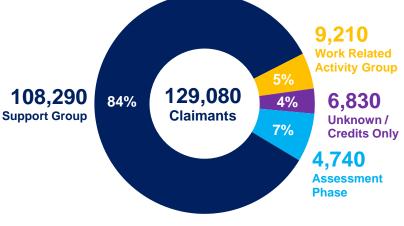

Jobseeker's Allowance Claims by Duration of Claim

Employment and Support Allowance – National Statistics

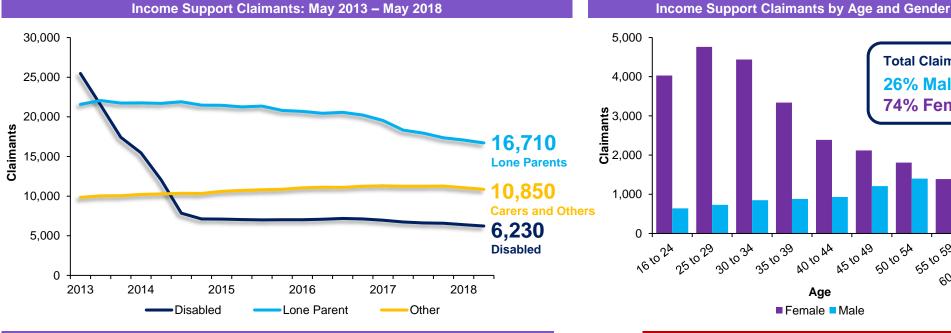

• The average weekly Employment and Support Allowance benefit payment was £138.07.

 Between 2010 and 2014, existing Incapacity Benefit and Severe Disablement Allowance customers were moved to ESA by reassessing their eligibility for the benefit. A small number of claimants remained on each benefit with numbers decreasing slightly over time due to attrition.

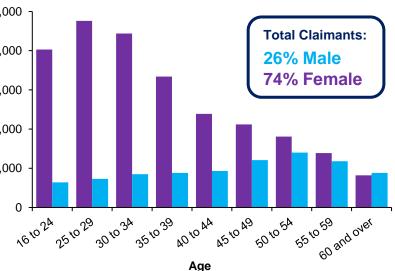

- At May 2018, there were 1,780 claimants of Incapacity Benefit and 1,210 claimants of Severe Disablement Allowance, decreases of 190 and 140 respectively on a year earlier.
- See <u>supplementary tables</u> for further information. Note: due to the diminishing numbers of claimants, supplementary tables are no longer produced for Incapacity Benefit and Severe Disablement Allowance.

Income Support – National Statistics

Key Facts

- At February 2018, the number of Income Support claimants was 33,790, a decrease . of 7.0% (2,530) since May 2017.
- Of the 33,790 claimants, 49% (16,710) are lone parents and 18% (6,230) are disabled.
- The average weekly Income Support benefit payment is £74.18.
- From 27th October 2008, Employment & Support Allowance (ESA) replaced Incapacity ٠ Benefit and Income Support paid on the grounds of incapacity for new claims. Migration of existing Disabled Income Support customers began in February 2011. This explains the fall in Disabled claimants however some have remained on Income Support because they qualify for another reason e.g. if they are a Lone Parent.
- The number of Lone Parents has been affected by the Lone Parent Obligations policy changes which came into effect in 2008. An extension of this is that from January 2017 existing Lone Parents with a youngest child aged 5 or over can no longer make a new or repeat claim for income support solely on the basis of their parental status. However, for this series Lone Parents are defined as "single claimants with a child under 16".
- See supplementary tables for further information.

Universal Credit (UC)

Female Male

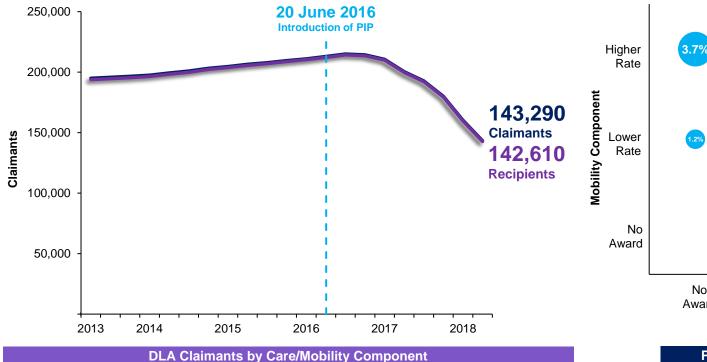

- Universal Credit (UC) is being introduced for new claims on a phased geographical basis across Northern Ireland from September 2017 to December 2018. As at May 2018, Universal Credit had been introduced in 17 Jobs & Benefits offices - these are listed in Note 7.
- In areas where UC has been introduced, there will be no • new claimants to the following benefits covered in this publication:
 - Income-based JSA
 - Income-related ESA
 - Income Support
- Statistics for UC are not included in this publication but will be published separately when available.

Disability Living Allowance – National Statistics

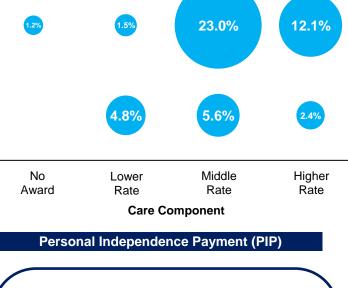

DLA Claimants & Recipients: May 2013 – May 2018

DLA Recipients by Care/Mobility Component

6.7%

- At May 2018, there were 143,290 claimants of Disability Living Allowance, a fall of 28.5% (57,080) on a year earlier. This fall is due to the introduction of Personal Independence Payment (PIP) on 20th June 2016.
- Of the 143,290 claimants, 17% (23,650) were children (under 16), 40%, (57,490) were aged between 16 and 64 and 43% (62,160) were aged over 65.
- Of the 143,290 claimants, 50% (72,140) were female and 50% (71,160) were male.
- There were 142,610 recipients of DLA and of these, 13% (18,130) were receiving the care component only, 5% (6,860) were receiving the mobility component only and 82% (117,620) were receiving both the care and mobility components.
- The average weekly Disability Living Allowance benefit payment was £95.77.
- See supplementary tables for further information.

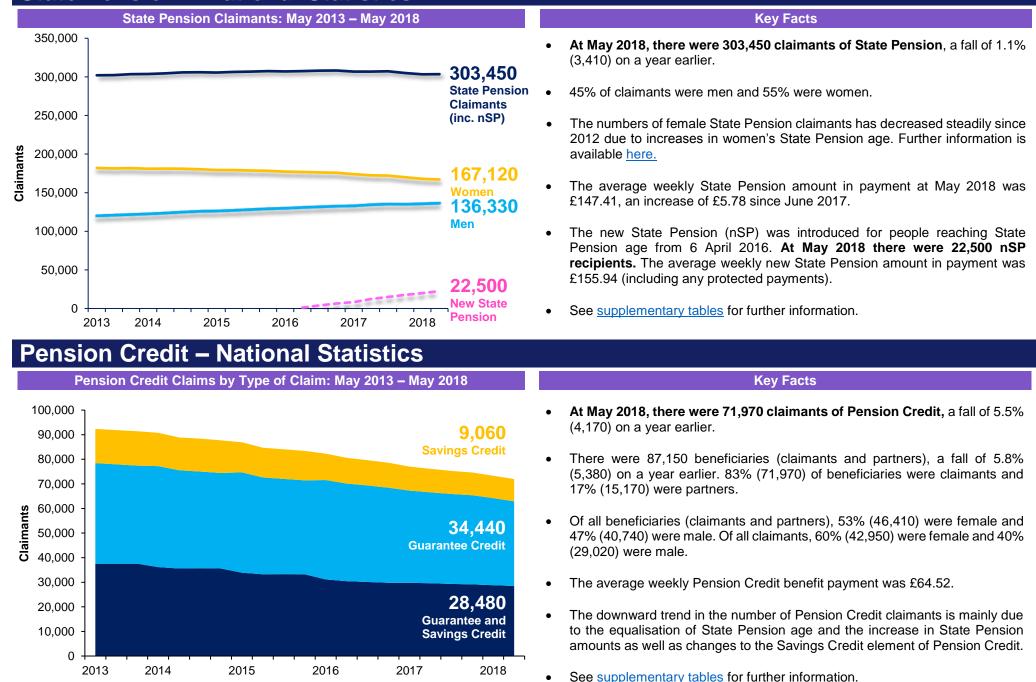

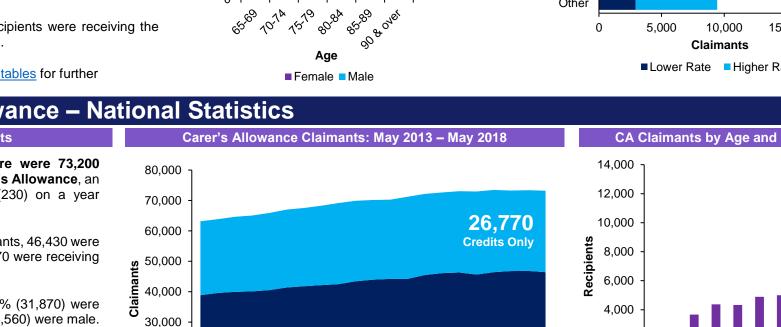

20.8%

18.2%

- With the introduction of Personal Independence Payment (PIP), there have been no new working age claimants to DLA from June 2016. The main reassessment of existing DLA claimants to PIP commenced in December 2016 and is expected to end in April 2019.
- At May 2018, there were 76,920 PIP claims in payment.
- Note that all PIP statistics are designated as Experimental Statistics and are therefore not included in this bulletin. Further PIP statistics are available via a <u>separate publication</u>.

Muscles/joint/bone disease

- At May 2018 there were 53,750 claimants of Attendance Allowance, a decrease of 2.2% (1,190) on a year earlier.
- Of the 53,750 claimants, 50,170 were recipients and 3,580 were receiving credits only.
- 64% (34,220) of claimants were female and 36% (19,540) of claimants were male.
- 65% (35,030) of claimants were aged 80 or over.
- 69% (34,730) of recipients were receiving the higher rate of award.
- See supplementary tables for further information.

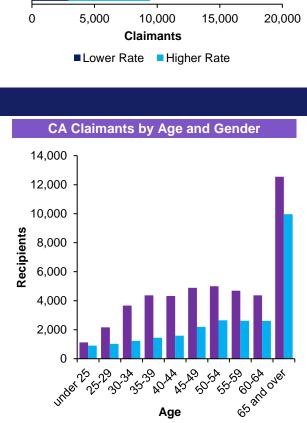

Carer's Allowance – National Statistics

Key Facts

- At May 2018, there were 73,200 claimants of Carer's Allowance, an increase of 0.3% (230) on a year earlier.
- Of the 73,200 claimants, 46,430 were recipients and 26,770 were receiving credits only.
- Of all recipients, 69% (31,870) were ٠ female and 31% (14,560) were male.
- Of all claimants, 69% (50,690) were • of working age and 31% (22,510) were of pension age.
- See supplementary tables for more information.

Client Group Analysis – National Statistics

Background Information & Key Facts

Data collected through the administration of individual benefits is merged together to create 'Client Group' data. This gives an estimate of the overall number of customers claiming benefit. Claimants have been allocated to statistical groups to give an indication of the main reason why they are claiming benefit. The benefits are arranged hierarchically and claimants are assigned to the first benefit they receive. Each customer is classified just once and as such the number of claimants of individual benefits quoted in the Client Group statistics may differ to the numbers published in the individual benefit publications. The hierarchy is detailed in Note 6 on page 11.

Note: Working age is 16-64 for men and is increasing from 16-60 to 16-64 for women between May 2010 and November 2018. Figures from May 2010 onwards reflect this change.

Key Facts

- At May 2018 there were 559,820 claimants of DfC administered benefits (excluding Housing Benefit, Personal Independence Payment and Universal Credit). Of these, 229,030 were of Working Age and 307,150 were of Pension Age. There were also 23,650 children under 16 claiming Disability Living Allowance.
- Between May 2017 and May 2018 the Working Age client group has decreased by 17,130 in total. This is largely as a result of a decrease in Working Age Jobseekers and the managed reassessment of existing Disability Living Allowance claimants to Personal Independence Payment. The phased introduction of Universal Credit will also have had a small effect. Data for PIP and UC is not yet included in this analysis.
- 70% (160,830) of Working Age claimants claimed one benefit only.
- 30% (68,200) of Working Age claimants were claiming more than one benefit. Of these claimants, 43,550 (64%) were claiming DLA.
- Of the 307,150 Pension Age claimants, 52% (160,900) were receiving State Pension Only.
- 23% (71,740) of Pension Age claimants were in receipt of Pension Credit. Of these Pension Credit claimants, 70% (49,930) were also claiming Attendance Allowance or Disability Living Allowance.
- See <u>supplementary tables</u> for further information.

Notes

1. Glossary of terms

Claimants:	The number of clients on the administrative system at the reference date.	
Recipients/Beneficiaries:	The number of clients on the administrative system at the reference date who received a benefit payment. For Pension Credit this includes	
	partners.	
Credits Only:	The number of clients entitled to the benefit, but who do not actually receive a payment.	

2. National Statistics Code of Practice

In June 2013, the United Kingdom Statistics Authority designated these statistics as National Statistics, in accordance with the Statistics and Registration Service Act 2007 and signifying compliance with the Code of Practice for Official Statistics. National Statistics status means that official statistics meet the highest standards of trustworthiness, quality and public value.

All official statistics should comply with all aspects of the Code of Practice for Official Statistics. They are awarded National Statistics status following an assessment by the Authority's regulatory arm. The Authority considers whether the statistics meet the highest standards of Code compliance, including the value they add to public decisions and debate.

Once statistics have been designated as National Statistics it is a statutory requirement that the Code of Practice shall continue to be observed.

3. Data source and quality

All statistics are based on 100% extracts from the benefit administrative systems. Data is partially validated and is deemed of sufficiently high quality to report on. Data is extracted at 2 weekly, 4 weekly or 6 weekly intervals. Data is represented as end of reported month to aid presentation, but actual extract data will not generally be exactly this date. The statistics show the number of people claiming benefit on the extract date.

As data is taken from live administrative systems, it relies on the customer reporting correct information about themselves and staff correctly inputting this data into the system. This does not always occur. Recent estimates indicate that approximately 1.3% of expenditure on benefits is misallocated due to Fraud and Error. Additional errors that do not result in an incorrect payment can also occur. The Department engages in initiatives to reduce the amount of Fraud and Error in the benefit systems on an ongoing basis.

4. Rounding/Disclosure control

The accuracy of statistics may be slightly effected by rounding and/or disclosure control. Even when data (either administrative or sample) do not contain National Insurance number, name and address it may still be possible to identify someone. Say, for example, a data table showed disability type, by ethnicity, within small geographic areas. Some of the cells in the table may only have one person in. It is possible in such cases for personal and sensitive information to be deduced. This is data disclosure and in DfC steps are taken to ensure that it doesn't happen. As an additional protective measure, details of the disclosure control methodology are not published.

5. Jobseeker's Allowance figures at ONS

The preferred source of numbers for Jobseeker's Allowance is the DfE/ONS claimant count figure; this is more up to date and contains clerical cases. The DfC JSA figures are presented here because they are consistent with the other benefits used to produce DfC National Statistics, and permit a wider set of breakdowns and cross-benefit analysis. The DfE/ONS figures are available via Nomis: https://www.nomisweb.co.uk/Default.asp

6. Statistical groups

Data collected through the administration of individual 'key' benefits are merged together to create 'Client Group' data. Each customer is classified just once. This gives an estimate of the overall number of customers claiming benefit. The client groups are 'Clients of working age' and 'Clients of pension age'.

DfC has a typology to define Statistical Groups within the Client Group classifications. The aim of the Statistical Group typology is to present each person by the main reasons they are in contact with the Department. Like the Client Group classification, each client is classified just once, permitting the estimation of the total number of people claiming one or more benefits. The Statistical Group hierarchy is as follows:

Statistical group	Benefit being claimed
Job Seeker	Job Seeker's Allowance
Employment and Support Allowance and incapacity benefits	Employment & Support Allowance, Incapacity Benefit or Severe Disablement Allowance
Lone Parent	Income Support with a child aged under 16 and no partner
Carer	Carer's Allowance
Others on income related benefit	Other Income Support or Pension Credit
Disabled	Disability Living Allowance or Attendance Allowance
Bereaved	Bereavement Benefit or Widow's Benefit
Claiming State Pension only	State Pension

The number of claimants of individual benefits quoted in the Client Group publication may differ to the numbers published in the individual benefit publications. Claimants have been allocated to statistical groups to give an indication of the main reason why they are claiming benefit. The benefits are arranged hierarchically and claimants are assigned to the first benefit they receive. Thus a lone parent receiving both Income Support and Incapacity Benefit would be assigned to the 'Employment & Support Allowance and incapacity benefits' group. For this reason, the 'Lone Parent' group will not contain all lone parents claiming Income Support. This also explains the disparity between the "Disabled" client group figures and the number of Disability Living Allowance recipients as the majority of working age DLA recipients are also receiving Employment and Support Allowance.

Note: Personal Independence Payment and Universal Credit figures are not yet included in the Client Group Analysis but will be added once they have been assessed as suitably robust.

7. Welfare Reform

Universal Credit (UC) is being introduced for new claims on a phased geographical basis across Northern Ireland from September 2017 to December 2018. As at May 2018, Universal Credit had been introduced in the following Jobs & Benefits offices:

Newry

Lurgan

Downpatrick

Limavady
Foyle

•

•

٠

- Ballymoney
- Magherafelt
- Coleraine
- Strabane

Enniskillen

Armagh

Omagh

Dungannon

- Newcastle
- Kilkeel

٠

٠

٠

Lisnagelvin
Portadown

In areas where UC has been introduced, there will be no new claimants to the following benefits covered in this publication: income-based JSA, Income-related ESA and Income Support. Statistics for UC are not included in this publication but will be published separately when available.

From 20 June 2016, DLA has been replaced for working age claimants by Personal Independence Payment (PIP). There have been no new working age claimants to DLA from this date. Reassessment of existing DLA claimants to PIP began in December 2016 and is expected to be complete by April 2019. Detailed PIP figures are not yet included within this publication and are published separately as Experimental Statistics until assessed as National Statistics. PIP statistics can be found <u>here</u>.

The age at which women reach State Pension age will gradually increase from 60 to 65 between 2010 and 2018. From 2018 the State Pension age will continue to increase for both men and women. The changes will introduce a small increase to the number of working age benefit recipients and a small reduction to the number of pension age recipients. More information is available from <u>NI Direct</u>.

The Lone Parent Obligation policy came into effect from 24th November 2008; Lone Parents with a youngest child aged 12 or over were no longer able to make a new or repeat claim for Income Support solely on the basis of their parental status. Existing Income Support Lone Parents with a youngest child aged 12 or over had their eligibility removed over a period of time commencing 2nd March 2009. From October 2009, this policy was extended to Lone Parents with a youngest child aged 10 or 11 and from October 2010, was extended to Lone Parents with a youngest child aged 7 or over. From January 2017, the policy has been extended to Lone Parents with a youngest child aged 5 or over. Many affected Lone Parents will leave Income Support and claim Jobseeker's Allowance. However, there are exceptions to these rules where the youngest child can legitimately be over the ages mentioned above. Similarly, some former Lone Parents remain on Income Support for other reasons (e.g. they have a long term caring responsibility and claim Carer's Allowance). However for this series, lone parents are defined as "single IS claimants with a child under 16".

8. Known issues, changes and revisions

Changes for this release

Population figures have been updated to the most recent mid-year estimates (June 2017).

Previous changes – November 2017 release

From November 2017, Lone Parents are defined as "single IS claimants with a child under 16", consistent with the methodology used by the Department for Work and Pensions (DWP). Previously, this included children under 18.

9. Great Britain statistics

Benefit statistics to cover Great Britain (England, Scotland and Wales) only are produced by the Department for Work and Pensions (DWP) and are available here: https://www.gov.uk/government/collections/dwp-statistical-summaries

10. Other National and Official Statistics issued by the Department for Communities

Other National and Official Statistics produced by the Department for Communities can be found on the DfC website at the following link: <u>https://www.communities-ni.gov.uk/topics/dfc-statistics-and-research</u>
