This booklet presents the most popular names given to babies whose birth was registered in Northern Ireland during 2020 and includes all live births to both resident and non-resident mothers. It examines the top 100 first names for boys and girls and discusses additional first names, variations in first name by the age and country of birth of the mother, and makes regional comparisons across Northern Ireland. It also discusses the change in popularity of names over time.

It should be noted that the year of registration is not necessarily the year in which the birth occurred as, for example, a birth that occurred towards the end of December 2020 may not have been registered until early January 2021. Similarly, some names included in this booklet for 2020 will have been given to babies born towards the end of 2019. It should also be noted that different spellings of a name have been treated as separate names, for example Amelia and Amelija. In contrast, names containing accents have been treated as if they did not have those accents, for example Séan is counted together with Sean.

Key users of baby name statistics include parents, soon-to-be parents and those who are interested in the popularity of their own name. Additional users include researchers who examine how names are changing over time and journalists who produce articles on the popularity of names.

The popularity of baby names can be influenced by a variety of factors including current celebrities, memorable places, religion, cultural and/or ethnic origins and names of relatives and friends.

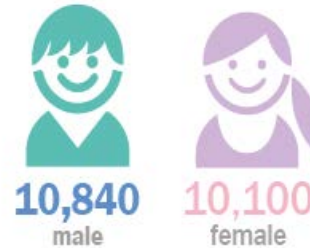

A total of 20,940 births were registered in Northern Ireland during 2020.

There were slightly more births of males (10,840) than females (10,100) registered, accounting for 51.8 per cent and 48.2 per cent of all registrations respectively.

As with previous years, a greater variety of girls' names (2,158) than boys' names (1,719) were registered in 2020. The range of names being used by parents has grown considerably over the past 40 years, with 1,224 girls' names and 650 boys' names being registered in 1980.

There were 381 new boys' names and 485 new girls' names registered in 2020 that had not been registered since the reporting of baby names began in 1997. Some 56 per cent of the new names were for girls and 44 per cent were for boys.
